University of Mumbai

No. AAMS_UGS/ICC/2023-24/22

CIRCULAR:-

Attention of the Principals of the Affiliated Colleges and Directors of the Recognized Institutions in Faculty of Science & Technology is invited to this office Circular No. AAMS/(UG)/127 of 2022-23 dated 20th October, 2022 relating to the revised syllabus of B.E. (Biomedical Engineering) (Sem –VII & VIII) (CBCS) (REV -2019 'C' Scheme).

They are hereby informed that the recommendations made by Chairperson, Ad-hoc Board of Studies in **Biomedical Engineering** at its online meeting held on 13th May, 2022 and subsequently passed by the Board of Deans at its meeting held on 08th December, 2022 **vide** item No. 6.1 (R) have been accepted by the Academic Council at its meeting held on 06th April, 2023 **vide** item No. 6.3 (R) and that in accordance therewith, **Biomedical Engineering,** with necessary changes which are as follows:-

1) An error in Sem VII Scheme of Biomedical Engineering in the examination scheme of Major Project – I, the term work marks were typed as 50 marks instead of 25 marks in term work and 25 marks under Pract / oral.

2) An error in Sem VIII Scheme of Biomedical Engineering in the examination scheme of Major Project – II, the term work marks was 100 and Pract / oral was 50. It has been corrected now as term work 50 marks and Pract / oral 100 marks.

For **B.E. (Biomedical Engineering) (Sem VII & VIII) (CBCS)** (Rev-2019 'C' Scheme) has been brought into force with effect from the academic year 2022-23.

(The said circular is available on the University's website www.mu.ac.in).

MUMBAI – 400 032
27th June, 2023

(Prof. Sunil Bhirud)
I/c. REGISTRAR

To

The Principals of the Affiliated Colleges and Directors of the Recognized Institutions in Faculty of Science & Technology.

A.C/6.3 (R) /06/04/2023

Copy forwarded with Compliments for information to:-

1) The Dean, Faculty of Science & Technology,
2) The Chairman, Board of Studies **Biomedical Engineering**,
3) The Director, Board of Examinations and Evaluation,
4) The Director, Board of Students Development,
5) The Director, Department of Information & Communication Technology,
6) The Co-ordinator, MKCL.

Copy for information and necessary action :-

1. The Deputy Registrar, College Affiliations & Development Department (CAD),
2. College Teachers Approval Unit (CTA),
3. The Deputy Registrar, (Admissions, Enrolment, Eligibility and Migration Department (AEM),
4. The Deputy Registrar, Academic Appointments & Quality Assurance (AAQA)
5. The Deputy Registrar, Research Administration & Promotion Cell (RAPC),
6. The Deputy Registrar, Executive Authorities Section (EA)
   He is requested to treat this as action taken report on the concerned resolution adopted by the Academic Council referred to the above circular.
7. The Deputy Registrar, PRO, Fort, (Publication Section),
8. The Deputy Registrar, Special Cell,
9. The Deputy Registrar, Fort Administration Department (FAD) Record Section,
10. The Deputy Registrar, Vidyanagari Administration Department (VAD),

Copy for information :-

1. The Director, Dept. of Information and Communication Technology (DICT), Vidyanagari,
   He is requested to upload the Circular University Website
2. The Director of Department of Student Development (DSD),
3. The Director, Institute of Distance and Open Learning (IDOL Admin), Vidyanagari,
4. All Deputy Registrar, Examination House,
5. The Deputy Registrars, Finance & Accounts Section,
6. The Assistant Registrar, Administrative sub-Campus Thane,
7. The Assistant Registrar, School of Engg. & Applied Sciences, Kalyan,
8. The Assistant Registrar, Ratnagiri sub-centre, Ratnagiri,
9. P.A to Hon'ble Vice-Chancellor,
10. P.A to Pro-Vice-Chancellor,
11. P.A to Registrar,
12. P.A to All Deans of all Faculties,
13. P.A to Finance & Account Officers, (F & A.O),
14. P.A to Director, Board of Examinations and Evaluation,
15. P.A to Director, Innovation, Incubation and Linkages,
16. P.A to Director, Department of Lifelong Learning and Extension (DLLE),
17. The Receptionist,
18. The Telephone Operator,

Copy with compliments for information to :-

19. The Secretary, MUASA
20. The Secretary, BUCTU.

University of Mumbai

Revised Syllabus for

B.E. (Biomedical Engineering)

Semester – (VII & VIII)

(Choice Based Credit System)

(With effect from the academic year 2022-23)

University of Mumbai

Syllabus for Approval

O: _____	Title of Course	B.E (Biomedical Engineering)
O: _____	Eligibility	As per the Ordinance O.6243
R: _____	Passing Marks	40 %
No. of years/Semesters:		4 years 8 Semesters
Level:		P.G. / U.G./ Diploma / Certificate (Strike out which is not applicable)
Pattern:		Yearly / Semester (Strike out which is not applicable)
Status:		Revised / New (Strike out which is not applicable)
To be implemented from Academic Year :		From Academic Year: 2022-23

Dr. Manali Godse
Chairperson,
Ad-hoc Board of
Studies in
Biomedical
Engineering

Dr. Suresh K. Ukarande
Associate Dean,
Faculty of Science and
Technology University
of Mumbai

Prof. Shivram S. Garje
Dean,
Faculty of Science and
Technology University of
Mumbai

Preamble

To meet the challenge of ensuring excellence in engineering education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. In line with this Faculty of Science and Technology (in particular Engineering) of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty resolved that course objectives and course outcomes are to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. Choice based Credit and grading system enables a much-required shift in focus from teacher-centric to learner-centric education since the workload estimated is based on the investment of time in learning and not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. Credit assignment for courses is based on 15 weeks teaching learning process, however content of courses is to be taught in 12-13 weeks and remaining 2-3 weeks to be utilized for revision, guest lectures, coverage of content beyond syllabus etc.

There was a concern that the earlier revised curriculum more focused on providing information and knowledge across various domains of the said program, which led to heavily loading of students in terms of direct contact hours. In this regard, faculty of science and technology resolved that to minimize the burden of contact hours, total credits of entire program will be of 170, wherein focus is not only on providing knowledge but also on building skills, attitude and self learning. Therefore in the present curriculum skill based laboratories and mini projects are made mandatory across all disciplines of engineering in second and third year of programs, which will definitely facilitate self learning of students. The overall credits and approach of curriculum proposed in the present revision is in line with AICTE model curriculum.

The present curriculum will be implemented for Second Year of Engineering from the academic year 2020-21. Subsequently this will be carried forward for Third Year and Final Year Engineering in the academic years 2021-22, 2022-23, respectively.

Dr. S. K. Ukarande

Associate Dean

Faculty of Science and Technology

Member, Academic Council, RRC in Engineering

University of Mumbai

Incorporation and implementation of Online Contents from NPTEL/ Swayam Platform

The curriculum revision is mainly focused on knowledge component, skill based activities and project based activities. Self learning opportunities are provided to learners. In the revision process this time in particular Revised syllabus of 'C ' scheme wherever possible additional resource links of platforms such as NPTEL, Swayam are appropriately provided. In an earlier revision of curriculum in the year 2012 and 2016 in Revised scheme 'A' and 'B' respectively, efforts were made to use online contents more appropriately as additional learning materials to enhance learning of students.

In the current revision based on the recommendation of AICTE model curriculum overall credits are reduced to 171, to provide opportunity of self learning to learner. Learners are now getting sufficient time for self learning either through online courses or additional projects for enhancing their knowledge and skill sets.

The Principals/ HoD's/ Faculties of all the institute are required to motivate and encourage learners to use additional online resources available on platforms such as NPTEL/ Swayam. Learners can be advised to take up online courses, on successful completion they are required to submit certification for the same. This will definitely help learners to facilitate their enhanced learning based on their interest.

Dr. S. K. Ukarande

Associate Dean

Faculty of Science and Technology

Member, Academic Council, RRC in Engineering

University of Mumbai

Preface By BoS

Engineering is an innovative field, the origin of ideas leading to everything from automobile to aerospace, skyscrapers to sonar. **Biomedical Engineering** focuses on the advances that improve human health and health care at all levels. Biomedical engineering is an interdisciplinary field with application of the principles of Basic Sciences, Mathematics, Engineering fundamentals and Biology for problem-solving.

The curriculum is designed to meet the challenges by include new age courses on Machine Learning, Artificial Intelligence, Data Analytics and other emerging technologies, dismantling the walls between engineering and scientific disciplines. The key to generate a new paradigm shift for careers in Biomedical Engineering for the next generation of talented minds lies in imparting high-quality education in Engineering.

Every course in the curriculum lists the course objectives and course outcomes for the learners tounderstand the skills that the learner will acquire after completing that course. Program outcomes are the skills and knowledge that a student will acquire during the course of four years of this engineering program. In line with this, Faculty of Technology of University of Mumbai has taken a lead in incorporating the philosophy of outcome based education in the process of curriculum development.

As the Chairman, Board of Studies in Biomedical Engineering of the University of Mumbai, I am happy to state here that, the Program Educational Objectives for undergraduate program were thoughtfully framed by faculty members from different affiliated institutes of the university. They are Heads of Departments and senior representatives from the Department of Biomedical Engineering.

The Program Educational Objectives for the undergraduate program in Biomedical engineering are listed below;

1. To prepare the learner with a sound foundation in the Human Physiology, Mathematics, Electronics, Computer Programming and engineering fundamentals.

2. To motivate the learner for self-learning, logical & analytical thinking and use of modern tools for solving real life problems.

3. To impart technical knowledge, competency skills, professional and ethical attitude, good leadership qualities to contribute in the field of healthcare.

4. To prepare the Learner for a successful career in healthcare industry such as sales & marketing, research & development, hospital administration and also to venture into higher education and entrepreneurship.

Course Objectives	- To understand the basic principles and working of life Saving Equipment. - To develop skills enabling Biomedical Engineers to serve the health care industry - To develop core competency and skill in the field of Biomedical Engineering, to design and develop new health care systems.	
Course Outcomes	**Learner will be able to…** - Distinguish between the types of pacemakers on the basis of ICHD code and analyze the various circuits. - Apply the knowledge of electronics to analyze defibrillator circuits. - Explain the importance of use of Anesthesia machine and Capnograph during Surgery. - Explain the basic principle, working and applications of surgical equipment with safety aspects. - Explain the importance of measurement of oxygen saturation in human body and application of heart lung machine during surgery.	

Module	Contents	Hours
1	**Cardiac Pacemakers** Need for a pacemaker, modes of operation, classification codes for pacemaker, external and implantable pacemaker, programmable pacemaker, Power sources for pacemakers, leads and electrodes, recent developments of Implantable Pacemakers.	09
2	**Cardiac Defibrillator** Need for defibrillator, D C defibrillator, modes of operation and electrodes, performance aspects of dc-defibrillator, implantable defibrillator, cardioverter.	08
3	**Physiotherapy equipments** Basic principle, working and technical specifications of 1.Shortwave Diathermy 2. Ultrasonic therapy unit 3. Nerve and Muscle Stimulator.	06
4	**Surgical equipment** Operation theatre Lights and Table. Surgical Diathermy machine, automated electrosurgical systems, electrodes used with surgical diathermy, safety aspects in electronic surgical units.	08
5	**Heart Lung machine** Heart Lung Machine and types of oxygenators	04
6	**Oximeters** Basics of oximeter, In-vitro and In-vivo oximetry, ear oximetry, pulse oximetry, skin reflectance oximeters, intravascular oximeters,	04

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Text books:

1. Handbook of Biomedical Instrumentation (Third edition): R S. Khandpur. (PH Pub)
2. Medical Instrumentation, Application and Design: J G. Webster. (John Wiley)
3. Biomedical Instrumentation and measurements: Leslie Cromwell, Fred J. Weibell, Enrich A. Pfeiffer. (PHI Pub)

Reference books:

1. Introduction to Biomedical Equipment Technology: Carr –Brown.
2. Encyclopedia of Medical Devices and Instrumentation: J G. Webster. Vol I- IV
3. Various Instrument Manuals.
4. Various internet websites.

Theory Examination:

1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions of marks will be asked.
4. Remaining questions will be randomly selected from all the modules.

BMC702	Machine Learning (ML)	20	20	20	80	3	--	--	--	--	100

Course Code	Course Name	Credits
BMC702	Machine Learning	03
Course Objectives	• To build a strong base in artificial intelligence through algorithm development. • To develop competency in logical thinking, computer programming and knowledge application. • To train and motivate for higher education and research in order to make contribution to state of the art health care for all	
Course outcomes	Learner will be able to • Understand the fundamental techniques and applications in neural network, deep learning and machine learning. • Understand supervised and unsupervised learning, back propagation and descent algorithms. • Understand and implement efficient computational techniques using neural network, deep learning and machine learning. • Design and implement neural network models for deep learning, thus a strong base for artificial intelligent systems.	

1	**Learning methods:** Introduction, types of learning, supervised learning, unsupervised learning, statistical learning, reinforcement learning, elements of reinforcement learning, model based learning, temporal difference learning, linear regression, least squares, linear regression for polynomial regression task, logistic regression, model selection and validation.	**06**
2	**Clustering:** Introduction, mixture densities, k-means clustering, expectation-maximization algorithm, supervised learning after clustering, spectral clustering, hierarchical clustering, choosing the number of clusters. **Decision Trees:** Introduction, unvariant trees, rule extraction from trees, learning rules form data, multivariate trees, clustering, overfitting and evaluation.	
3	**Design and analysis of machine learning experiments:** Introduction, factors, response, and strategy of experimentation, response surface design randomization, replication, and blocking, guidelines for machine learning experiments, cross-validation and resampling methods, measuring performance classifier	**06**
4	**Introduction of artificial neural networks:** structure and function of a biological neurons, artificial neuron models, concepts of neural network, single layer and multilayer preceptor, structure of an ANN, feed-forward neural network, gradient descent, back propagation, architectures of neural networks, optimization of neural network model	**06**
5	**Architecture and training the ANN:** Type of learning the neural network, training of a single-layer neural network, delta rule, designing ANN models, radialbasis function, overview of learning rules and parameters, activation functions, multilayer feed forward network, backpropagation networks, architecture, radial basis function network	**07**
6	**Fundamentals of deep networks:** Deep Learning, architectural principles of deep networks, parameters, layers, loss function, optimization algorithms, hyper parameters, building blocks of deep networks, architectures of deep networks, convolutional neural networks, architecture of convolutional neural networks, input layers, convolutional layers, pooling layers, fully connected layers, recurrent neural networks, architecture of recurrent neural network	**07**

Assessment

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

BMC702	Biological Modeling and Simulation	03
Course Objectives	• To understand basic concepts of modeling for designing biological model. • To simulate physiological processes for better understanding. • To develop competency in terms of logical thinking, programming and application skills • To train and motivate students for pursuing higher education and research for developing cutting edge technologies.	
Course Outcomes	**A learner will be able to:** • Categorise different types of biological models. • Develop a model of a neuron using Hodgkin Huxley exp setup. • Differentiate a spindle receptor and Golgi tendon bodies. • Design a quantitative model for eye movement system. • Understand a basic model of a thermoregulatory system. • Understand the behaviour of immune system	

Module	Contents	Time
1	**Physiological modeling**: Steps in modeling, purpose of modeling, lumped parameter models, distributed parameter models, compartmental modeling, modeling of circulatory system.	04
2	**Model of neurons:** Biophysics tools, Nernst Equation, Donnan Equilibrium, active transport (Pump) GHK equation, action potential, voltage clamp, channel characteristics, Hodgkin-Huxley conductance equations, simulation of action potential, electrical equivalent model of a biological membrane, impulse propagation- core conductor model, cable equations.	11
3	**Neuromuscular system:** Modeling of skeletal muscle, mono and polysynaptic reflexes, stretch reflex, reciprocal innervations, two control mechanism, Golgi tendon, experimental validation, Parkinson's syndrome.	06
4	**Eye movement model:** Four eye movements, quantitative eye movement models, validity criteria.	06
5	**Thermo-regulatory systems:** Thermoregulatory mechanisms, electrical model of thermoregulatory system, controller model, validation and application.	06
6	**Modeling of other physiological systems.** **Modeling the immune response:** Behavior of the immune system, linearized model of the immune response. Modeling of insulin glucose feedback system and Pulsatile insulin secretion	06

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Text books:

1. Bioengineering, Biomedical, Medical and Clinical Engg.: A.Teri Bahil.
2. Signals and systems in Biomedical Engg.: Suresh R Devasahayam.
3. Bio-Electricity A quantitative approach by Barr and Ploncey

Reference Books:

1. Biomedical Engineering Handbook by Bronzino (CRC Press)

Theory Examination:

1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions will be asked.
4. Remaining questions will be randomly selected from all the modules.

Course Objectives	• The course introduces the students to the field of Bioinformatics. • To make students aware about the methods to characterize and manage the different types of biological data. • To introduce students to the basics of sequence alignment and analysis.	
Course Outcomes	**Learner will be able to** • Get introduced to the basic concepts of Bioinformatics and its significance in Biological data analysis. • Apply knowledge of basic principles of mathematics and statistics. • Apply existing software effectively to extract information from large databases and to use this information in computer modelling • Apply problem-solving skills to multivariate methods in bioinformatics • Search and apply bioinformatics tools to analyse and interpret biological data	

Module	Contents	Hours
1	**Introduction to bioinformatics and biological databases:** Basic principles of genetics, cells, DNA and chromosome, genes and the genome, DNA sequencing, proteomics, discovery of gene sequence. Human genome project, biological databases and their classification, genome sequence databases, protein structure databases, composite databases.	08
2	**Statistical methods used in bioinformatics:** Basic statistical modelling and Bayesian inference, gene expression and microarray analysis, sequence alignment, sequence pattern discovery, combining sequence and expression information.	10
3	**Algorithms in bioinformatics:** Introduction, dynamic programming and sequence alignment, Needleman–Wunsch algorithm, Greedy algorithms for Genome rearrangement, string algorithm, breakpoint graph, approximation algorithm, FASTA and BLAST algorithms..	08
4	**Multivariate Methods in Bioinformatics:** Multivariate normal distribution, multivariate hypothesis tests, principlecomponent analysis, orthogonal factor model, linear discriminant analysis, classification methods, Naïve Bayes classification.	06
5	**Applications and tools of bioinformatics:** Sequence alignment and dotplot, DNA sequence analysis, protein sequence analysis, database similarity search, phylogenic analysis and tree construction, gene, protein and tissue microarray.	07

Assessment:
Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Recommended Online Courses (optional):
1. "Bioinformatics and Computational Biology" offered by IIT Kanpur **https://piazza.com/iitk.ac.in/secondsemester2018/bse322a/**
2. "Network Analysis in Systems Biology" offered by Icahn School of Medicine at Mount Sinai, in New York City **https://www.coursera.org/learn/network-biology**
3. "Bioinformatics: Introduction and Methods" from Peking University. **https://www.coursera.org/learn/bioinformatics-pku**
4. "Biology Meets Programming : Bioinformatics for Beginners", offered by UC San Diego **https://www.coursera.org/learn/bioinformatics**

Books Recommended:
Text books:
1. Basics of Bioinformatics, Rui Jiang, Xuegong Zhang, Michael Q. Zhang, Springer, E-book.
2. Introduction to Bioinformatics, Arthur M. Lesk, Oxford University Press, 2002, First Edition.

Reference Books:
1. Essential Bioinformatics, Jin Xiong, Cambridge University Press, 2006, First Edition.

Theory Examination:
1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions will be asked.
4. Remaining questions will be randomly selected from all the modules.

Course Objectives	• Learn the concepts of IOT • Identify different technologies and schemes • Learn different applications in IOT • Learn different protocols used in IOT • Learn how to analyze the data in IOT	
Course Outcomes	**Learner will be able to** • Apply the concepts of IOT • Identify and select different technologies and scheme for IOT applications • Apply IOT to different applications • Analyze and evaluate protocols used in IOT systems • Analyze dataflow in IOT systems	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module	Contents	Hours
1	**Introduction:** History of IoT, Objects in IoT, Identifier in the IoT, Technologies in IoT. What are wireless sensors, Sensor family, Architecture of single node sensor.	**04**
2	**IoT schemes and models:** Block diagram of an IoT device (node), characteristics of IoT, functional blocks of IoT, communication models. IoT levels and deployment templates. IoT enabling technologies.	**08**
3	**IoT stack:** M2M stack and examples, IoT stack and examples, IoT stack variants, difference between IoT and M2M. IoT Access Technologies: Physical and MAC layers, IEEE 802.15.4, 802.15.4g, 802.15.4e, 1901.2a, 802.11 and LoRaWAN.	**08**
4	**Network and Communication Aspects:** Network Layer Protocols: IPv4 and IPv6, Constrained nodes and Constrained networks Optimizing IP for IoT: From 6LoWPAN to 6Lo, routing over low power and lossy networks. Application Layer Protocols: CoAP and MQTT.	**05**
5	**Components of IoT:** IoT platform design methodology. IoT end device computing –boards based on microcontroller and SoC. Sensor technologies, sensor data communication protocols: UART, SPI, I2C.	**06**
6	**IoT Case Studies:** Home automation, smart cities, environment monitoring and control, agriculture, retail sector, healthcare and lifestyle, logistics and supply chain, access control and tracking.	**08**

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Recommended Online Courses (optional):

1) Introduction To Internet Of Things
   By Prof. Sudip Misra | IIT Kharagpur
   https://onlinecourses.nptel.ac.in/noc22_cs52/preview

2) Introduction To Industry 4.0 And Industrial Internet Of Things
   By Prof. Sudip Misra | IIT Kharagpur
   https://onlinecourses.nptel.ac.in/noc22_cs52/preview

Books Recommended:

Text books:

1) Internet of Things: A Hands-On Approach, Arshdeep Bahga, Vijay Madisetti, universities press.
2) IOT fundamentals, David, Gonzalo, Patrick, Cisco press.
3) Data and Computer communications, william stallings, Pearson Education.
4) Data communication and networking, Behrouz A. Forouzan, McGraw Hill Education Communication Networks, Alberto Leon Garcia, McGraw Hill Education.

Reference Books:

1) Computer Networks, S. Tanenbaum, Pearson Education.
2) Computer Networking: A Top-Down Approach, J. F. Kurose and K. W. Ross, Addison Wesley.

Theory Examination:

1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions will be asked.
4. Remaining questions will be randomly selected from all the modules.

Course Code	Course Name	Credits
BMDO7021	Rehabilitation Engineering	03
Course Objectives	• To Introduce the socio-legal aspects of Rehabilitation Engineering • To understand the importance of Orthotics, and Prosthesis • To introduce learners to basics of Kinetics and Kinematics. • To understand the flow properties of blood. • To understand various upper and lower limb deformities. • To understand the rehabilitation management of various deformities	
Course Outcomes	**A learner will be able to** • Understand the basic difference between Impairment, Disability and Handicap • Understand the reasons for Amputation, need of Orthosis, Prosthesis. • Understand the human joint's stability. • Understand the flow pattern of blood in normal and abnormal conditions. • Understand management of simple to complex deformities • Understand the rehabilitation management during paralytic conditions of the limb	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module	Contents	Hours
1	Introduction and socio-legal aspects of rehabilitation engineering: Medical rehabilitation, epidemiology of rehabilitation, preventive rehabilitation, impairment disability and handicap.	03
2	Orthotics, amputation, and prosthetics, activities of daily living (ADL): Orthotics: General principles of orthotics, biomechanics of orthotics, classification: upper & lower extremity orthotics, spinal orthotics Amputation & prosthetics: Causes of amputation, types of amputation, and levels of amputation for upper and lower extremity, preoperative and post-operative period. pre-prosthetic stage, endo & exo-skeletal prosthetics, classification of upper & lower limb prosthetics Activities of daily living: ADL grouping, Barthel's index of ADL, functional independence, measures, environmental control system, communication, ADL training.	10
3	Mechanical principles of Kinematics and Kinetics: Planar classification of position and motion, rotary and translatory motion, degree of freedom, kinematic chain theories of motion, levers, torque, parallel force, resolution of force, calculation of muscle and joint forces Clinical application on weight and center of gravity ,applied weights and resistance, muscle force and leverage, joint forces, clinical application on stretching versus joint mobilization.	06
4	Flow properties of blood: An outline of blood rheology, constitutive equation of blood based viscometric data and Casson's equation, laminar flow of blood in a tube, fluid mechanical interaction of RBCs with a solid wall, thrombus formation and dissolution, medical application of blood rheology.	06
5	Common deformities and role of surgery in rehabilitation engineering. Types of deformities, management of 1st and 2nd degree deformities, common deformities of lower limb, treatment for partial foot deformities, deformities of the foot, arm Deformities, torticollis	06
6	**An overview of rehabilitation of muscular dystrophy, paraplegia, and quadriplegia:** Muscular dystrophy, Duchenne muscular dystrophy, rehabilitation, facioscapulohumeral muscular dystrophy Paraplegia: Etiology, mechanism of injury, identification of level of lesion, management of active spinal cord injury, rehabilitation, gait training Quadriplegia: Mobility, training, level of injury & outcome, management.	08

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Text books:

1. BRUNNSTROM'S CLINICAL KINESIOLOG, By Laura K Smith, Elizabeth Laurance Weiss; Jaypee brothers Publication
2. Mechanical properties of living tissues by Y. C. Fung

Reference Books:

1. Textbook of Rehabilitation by S. Sundar, 3rd edition Jaypee publication

Theory Examination:

1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions of marks will be asked.
4. Remaining questions will be randomly selected from all the modules.

Course Code	Course Name	Credits
BMDO7022	**Lasers & Fibre Optics**	**03**
Course Objectives	• To help the students to build up a detailed knowledge of the methods, fabrication, and applications of lasers & fiber optics in medical engineering. • To create a platform for students to have deeper understanding on the fundamental principles of lasers and Optical fibers in bio-photonic systems.	
Course Outcomes	Learner will be able to: • Understand types of optical source and its emission properties. • Analyze the various types of lasers and their medical applications • Familiarize the fundamentals of optical fibers. • Understand the interaction of laser with tissue along with its applications • Understand and implement the use of lasers and optical fibers for surgery and sensing.	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module	Contents	Hours
1.	**Introduction to optical radiation, emission & resonator:** Spontaneous and stimulated emission, Einstein's coefficients, gain coefficient, laser oscillation conditions, population inversion, three and four level systems, rate equations, optical resonators and types, modes and mode stability criteria, losses in optical resonators-quality factor.	06
2.	**Types of Lasers:** Working principle of Ruby laser, dye laser, argon ion laser, solid state lasers-fundamental and higher harmonic generation. Detailed study of semiconductor lasers, Nd: YAG laser- flash lamp pumped and diode pumped lasers, He-Ne laser, CO2 laser, excimer laser, nitrogen laser, free electron laser, Ti: Saphire laser, rare earth doped and photonic crystal fiber based lasers, soliton lasers. Chemical lasers, metal vapors lasers, medical applications of Lasers.	**07**
3.	**Fundamentals of fiber optics:** Classification of fibers- step index, graded index fiber, numerical aperture, modes in optical fiber, single mode and multimode fiber, V- parameter, evanescent modes, losses in fiber, dispersion in fiber, special fiber-polarization maintaining fiber, non-linear effects in optical fiber, fiber fabrication techniques, splicing.	07
4.	**Photobiology & bioimaging:** Interaction of light with cells and tissues, photo-processes in biopolymers, human eye and vision, optical fiber delivery system, Optical coherence tomography, Applications of bio-imaging: bio-imaging probes and fluorophores, Endoscopy.	**06**
5.	**Optical sensors:** MM and SM fibers for sensing, Lasers & LEDs suitable for sensing, PIN & APDs for fiber optic sensing. Principles of electro optic modulators bulk & integrated optic modulators, optical sensor types, advantages and disadvantages of fiber optic sensors, intensity modulated sensors, interferometric sensors, rotation sensors, bio sensors.	**07**
6.	**Laser and fiber activated therapy:** Photodynamic therapy, photo-sensitizers for photodynamic therapy, tissue engineering using light, Laser system in cardiovascular disease, gastroenterology, gynecology, neurosurgery, oncology, ophthalmology, orthopedics, otolaryngology (ENT), urology, lasers and fibers in skin treatment.	**06**

Internal Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Course Code	Course Name	Credits
BMDO7023	Networking and Information Systems in Medicine	03
Course Objectives	• To understand the fundamental component of computer Networking. • To understand the functioning and configuration of various networking devices and components. • To understand a concept about network security. • Understand various Information system used in Healthcare System • To understand the healthcare IT infrastructure Understand various IHE domains	

	Learners will be able to:
Course Outcomes	• Understand the fundamental components of computer networks and networking protocols. • Understand IP addressing, functioning and configuration of various networking devices and components • Understand concepts about network security • Understand the PACS components, architecture and PACS tele radiology • Understand HIS, RIS, integration of HIS/RIS/PACS, PACS archive storage • Understand IHE and IHE domains

Module	Contents	Hours
1.	PACS Components; PACS generic workflow; PACS architectures: stand-alone, client-server, and web-based; PACS and teleradiology	06
2.	Introduction to RIS and HIS, HIS/RIS/PACS integration; PACS archive storage: RAID; HIPPA	06
3.	Integrating Healthcare Enterprise: IHE workflow model, IHE domains, IHE patient information reconciliation profile, IHE radiology information integration profile	06
4.	Performance of network/device parameters: bandwidth, throughput, jitter, latency network technology; types of cables and connectors, crossover and straight through cables, colour coding of cables; OSI Model; TCP/IP, Addressing types (IP, MAC, Port & Specific)	08
5.	IP V4 addressing, subnetting, supernetting; IP V6 addressing; Detailed working of networking equipment: Hub, bridge , switch, router, modem	07
6.	Basic Security Concepts: Security Mechanism and security services, authentication, authorization, confidentiality, integrity, non-repudiation; Symmetric and asymmetric key cryptography, RSA algorithm	06

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Textbooks:
1. PACS and Imaging Informatics by H.K. Huang, Second Edition, Wiley and Blackwell.
2. PACS: A Guide to the Digital Revolution by Keith J. Dreyer, Springer.
3. Data Communication and Networking by Behrouz A. Forouzan, McGraw Hill.
4. Computer Networks by A.S. Tanenbaum, Pearson Education.

Reference Books:
1. Governance of Picture Archiving and Communications Systems by Carrison K.S. Tong, Eric T.T. Wong (Medical Information Science Reference).
2. Practical Imaging Informatics, By Barton F. Branstetter, Springer.
3. PACS Fundamentals by Herman Oosterwijk.
4. Cryptography and Network Security By William Stalling, Pearsons.

Theory Examination:
1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions of 2 to 5 marks will be asked.
4. Remaining questions will be randomly selected from all the modules.

Course Objectives	• To familiarize the students with the need, benefits and components of PLM • To acquaint students with Product Data Management & PLM strategies • To give insights into new product development program and guidelines for designing and developing a product • To familiarize the students with Virtual Product Development
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Gain knowledge about phases of PLM, PLM strategies and methodology for PLM feasibility study and PDM implementation. • Illustrate various approaches and techniques for designing and developing products. • Apply product engineering guidelines / thumb rules in designing products for moulding, machining, sheet metal working etc. • Acquire knowledge in applying virtual product development tools for components, machining and manufacturing plant

Module	Detailed Contents	Hours
1	**Introduction to Product Lifecycle Management (PLM):** Product Lifecycle Management (PLM), Need for PLM, Product Lifecycle Phases, Opportunities of Globalization, Pre-PLM Environment, PLM Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, Focus and Application, A PLM Project, Starting the PLM Initiative, PLM Applications **PLM Strategies:** Industrial strategies, Strategy elements, its identification, selection and implementation, Developing PLM Vision and PLM Strategy, Change management for PLM	10
2	**Product Design:** Product Design and Development Process, Engineering Design, Organization and Decomposition in Product Design, Typologies of Design Process Models, Reference Model, Product Design in the Context of the Product Development Process, Relation with the Development Process Planning Phase, Relation with the Post design Planning Phase, Methodological Evolution in Product Design, Concurrent Engineering, Characteristic Features of Concurrent Engineering, Concurrent Engineering and Life Cycle Approach, New Product Development (NPD) and Strategies, Product Configuration and Variant Management, The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process	09
3	**Product Data Management (PDM):** Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation	05
4	**Virtual Product Development Tools:** For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modeling and simulations in Product Design, Examples/Case studies	05
5	**Integration of Environmental Aspects in Product Design:** Sustainable Development, Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies, End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle Environmental Strategies and Considerations for Product Design	05
6	**Life Cycle Assessment and Life Cycle Cost Analysis:** Properties, and Framework of Life Cycle Assessment, Phases of LCA in ISO Standards, Fields of Application and Limitations of Life Cycle Assessment, Cost Analysis and the Life Cycle Approach, General Framework for LCCA, Evolution of Models for Product Life Cycle Cost Analysis	05

Assessment:

Internal Assessment for 20 marks: Consisting Two Compulsory Class Tests

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

Course Objectives	- To familiarize the students with various aspects of probability theory - To acquaint the students with reliability and its concepts - To introduce the students to methods of estimating the system reliability of simple and complex systems - To understand the various aspects of Maintainability, Availability and FMEA procedure
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** - Understand and apply the concept of Probability to engineering problems - Apply various reliability concepts to calculate different reliability parameters - Estimate the system reliability of simple and complex systems - Carry out a Failure Mode Effect and Criticality Analysis

Module	Detailed Contents	Hours
1	**Probability theory:** Probability: Standard definitions and concepts; Conditional Probability, Baye's Theorem. **Probability Distributions:** Central tendency and Dispersion; Binomial, Normal, Poisson, Weibull, Exponential, relations between them and their significance. **Measures of Dispersion:** Mean, Median, Mode, Range, Mean Deviation, Standard Deviation, Variance, Skewness and Kurtosis.	**08**
2	**Reliability Concepts:** Reliability definitions, Importance of Reliability, Quality Assurance and Reliability, Bath Tub Curve. **Failure Data Analysis:** Hazard rate, failure density, Failure Rate, Mean Time To Failure (MTTF), MTBF, Reliability Functions. **Reliability Hazard Models:** Constant Failure Rate, Linearly increasing, Time Dependent Failure Rate, Weibull Model. Distribution functions and reliability analysis.	**08**
3	**System Reliability:** System Configurations: Series, parallel, mixed configuration, k out of n structure, Complex systems.	**05**

University of Mumbai, Biomedical Engineering, Rev 2022-23

4	**Reliability Improvement:** Redundancy Techniques: Element redundancy, Unit redundancy, Standby redundancies. Markov analysis. System Reliability Analysis – Enumeration method, Cut-set method, Success Path method, Decomposition method.	**08**
5	**Maintainability and Availability:** System downtime, Design for Maintainability: Maintenance requirements, Design methods: Fault Isolation and self-diagnostics, Parts standardization and Interchangeability, Modularization and Accessibility, Repair Vs Replacement. Availability – qualitative aspects.	**05**
6	**Failure Mode, Effects and Criticality Analysis:** Failure mode effects analysis, severity/criticality analysis, FMECA examples. Fault tree construction, basic symbols, development of functional reliability block diagram, Fau1t tree analysis and Event tree Analysis	05

ILO 7014	**Design of Experiments**	**20**	**20**	**20**	**80**	**3**	**--**	**--**	**100**

Course Objectives	• To understand the issues and principles of Design of Experiments (DOE) • To list the guidelines for designing experiments • To become familiar with methodologies that can be used in conjunction with experimental designs for robustness and optimization
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Plan data collection, to turn data into information and to make decisions that lead to appropriate action • Apply the methods taught to real life situations • Plan, analyse, and interpret the results of experiments

Module	Detailed Contents	Hours
1	**Introduction** 1.1 Strategy of Experimentation 1.2 Typical Applications of Experimental Design 1.3 Guidelines for Designing Experiments 1.4 Response Surface Methodology	06
2	**Fitting Regression Models** 2.1 Linear Regression Models 2.2 Estimation of the Parameters in Linear Regression Models 2.3 Hypothesis Testing in Multiple Regression 2.4 Confidence Intervals in Multiple Regression 2.5 Prediction of new response observation 2.6 Regression model diagnostics 2.7 Testing for lack of fit	08

3	**Two-Level Factorial Designs** 3.1 The 2^2 Design 3.2 The 2^3 Design 3.3 The General 2^k Design 3.4 A Single Replicate of the 2^k Design 3.5 The Addition of Center Points to the 2^k Design, 3.6 Blocking in the 2^k Factorial Design 3.7 Split-Plot Designs	07	
4	**Two-Level Fractional Factorial Designs** 4.1 The One-Half Fraction of the 2^k Design 4.2 The One-Quarter Fraction of the 2^k Design 4.3 The General 2^{k-p} Fractional Factorial Design 4.4 Resolution III Designs 4.5 Resolution IV and V Designs Fractional Factorial Split-Plot Designs	07	
5	**Response Surface Methods and Designs** 5.1 Introduction to Response Surface Methodology 5.2 The Method of Steepest Ascent 5.3 Analysis of a Second-Order Response Surface Experimental Designs for Fitting Response Surfaces	07	
6	**Taguchi Approach** 6.1 Crossed Array Designs and Signal-to-Noise Ratios 6.2 Analysis Methods Robust design examples	04

Assessment:

Internal Assessment for 20 marks:

Consisting **Two Compulsory Class Tests**

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions**, **each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved**.

Course Objectives	• Formulate a real-world problem as a mathematical programming model. • Understand the mathematical tools that are needed to solve optimization problems. • Use mathematical software to solve the proposed models.
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Understand the theoretical workings of the simplex method, the relationship between a linear program and its dual, including strong duality and complementary slackness. • Perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change. • Solve specialized linear programming problems like the transportation and assignment problems, solve network models like the shortest path, minimum spanningtree, and maximum flow problems. • Understand the applications of integer programming and a queuing model and compute important performance measures

Module	Detailed Contents	Hours
1	**Introduction to Operations Research**: Introduction, Structure of the Mathematical Model, Limitations of Operations Research **Linear Programming**: Introduction, Linear Programming Problem, Requirements of LPP, Mathematical Formulation of LPP, Graphical method, Simplex Method Penalty Cost Method or Big M-method, Two Phase Method, Revised simplex method, **Duality**, Primal – Dual construction, Symmetric and Asymmetric Dual, Weak Duality Theorem, Complimentary Slackness Theorem, Main Duality Theorem, Dual Simplex Method, Sensitivity Analysis **Transportation Problem**: Formulation, solution, unbalanced Transportation problem. Finding basic feasible solutions – Northwest corner rule, least cost method and Vogel's approximation method. Optimality test: the stepping stone method and MODI method. **Assignment Problem**: Introduction, Mathematical Formulation of the Problem, Hungarian Method Algorithm, Processing of n Jobs Through Two Machines and m Machines, Graphical Method of Two Jobs m Machines Problem Routing Problem, Travelling Salesman Problem **Integer Programming Problem**: Introduction, Types of Integer Programming Problems, Gomory's cutting plane Algorithm, Branch and Bound Technique. Introduction to Decomposition algorithms.	14
2	**Queuing models**: queuing systems and structures, single server and multi-server models, Poisson input, exponential service, constant rate service, finite and infinite population	05
3	**Simulation**: Introduction, Methodology of Simulation, Basic Concepts,Simulation Procedure, Application of Simulation Monte-Carlo Method: Introduction,Monte-Carlo Simulation, Applications of Simulation, Advantages of Simulation, Limitationsof Simulation	05
4	**Dynamic programming**. Characteristics of dynamic programming. Dynamic programming approach for Priority Management employment smoothening, capital budgeting, Stage Coach/Shortest Path, cargo loading and Reliability problems.	05
5	**Game Theory**. Competitive games, rectangular game, saddle point, minimax (maximin) method of optimal strategies, value of the game. Solution of games with saddle points, dominance principle. Rectangular games without saddle point – mixed strategy for 2 X 2 games.	05
6	**Inventory Models**: Classical EOQ Models, EOQ Model with Price Breaks, EOQ with Shortage, Probabilistic EOQ Model,	05

Course Objectives	• To understand and identify different types cybercrime and cyber law • To recognized Indian IT Act 2008 and its latest amendments • To learn various types of security standards compliances
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Understand the concept of cybercrime and its effect on outside world • Interpret and apply IT law in various legal issues • Distinguish different aspects of cyber law • Apply Information Security Standards compliance during software design and development

Module	Detailed Contents	Hours
1	**Introduction to Cybercrime:** Cybercrime definition and origins of the world, Cybercrime and information security, Classifications of cybercrime, Cybercrime and the Indian ITA 2000, A global Perspective on cybercrimes.	4
2	**Cyber offenses & Cybercrime:** How criminal plan the attacks, Social Engg, Cyber stalking, Cyber café and Cybercrimes, Botnets, Attack vector, Cloud computing, Proliferation of Mobile and Wireless Devices, Trends in Mobility, Credit Card Frauds in Mobile and Wireless Computing Era, Security Challenges Posed by Mobile Devices, Registry Settings for Mobile Devices, Authentication Service Security, Attacks on Mobile/Cell Phones, Mobile Devices: Security Implications for Organizations, Organizational Measures for Handling Mobile, Devices-Related Security Issues, Organizational Security Policies and Measures in Mobile Computing Era, Laptops	9
3	**Tools and Methods Used in Cyberline:** Phishing, Password Cracking, Key loggers and Spywares, Virus and Worms, Steganography, DoS and DDoS Attacks, SQL Injection, Buffer Over Flow, Attacks on Wireless Networks, Phishing, Identity Theft (ID Theft)	6

University of Mumbai, Biomedical Engineering, Rev 2022-23

4	**The Concept of Cyberspace** : E-Commerce, The Contract Aspects in Cyber Law ,The Security Aspect of Cyber Law, The Intellectual Property Aspect in Cyber Law, The Evidence Aspect in Cyber Law , The Criminal Aspect in Cyber Law, Global Trends in Cyber Law , Legal Framework for Electronic Data Interchange Law Relating to Electronic Banking , The Need for an Indian Cyber Law	8
5	**Indian IT Act:** Cyber Crime and Criminal Justice: Penalties, Adjudication and Appeals Under the IT Act, 2000, IT Act. 2008 and its Amendments	6
6	**Information Security Standard compliances** SOX, GLBA, HIPAA, ISO, FISMA, NERC, PCI.	6

ILO 7017	**Disaster Management and Mitigation Measures**	**20**	**20**	**20**	**80**	**3**	**--**	**--**	**100**

Course Objectives	• To understand physics and various types of disaster occurring around the world • To identify extent and damaging capacity of a disaster • To study and understand the means of losses and methods to overcome /minimize it. • To understand role of individual and various organization during and after disaster • To understand application of GIS in the field of disaster management • To understand the emergency government response structures before, during and after disaster
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Get to know natural as well as manmade disaster and their extent and possible effects on the economy. • Plan of national importance structures based upon the previous history. • Get acquainted with government policies, acts and various organizational structure associated with an emergency. • Get to know the simple do's and don'ts in such extreme events and act accordingly.

Module	Detailed Contents	Hours
1	**Introduction** *1.1* Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. Introduction to global warming and climate change.	03
2	**Natural Disaster and Manmade disasters:** 2.1 Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion 2.2 Manmade Disasters: Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters.	09
3	**Disaster Management, Policy and Administration** 3.1 Disaster management: meaning, concept, importance, objective of disaster management policy, disaster risks in India, Paradigm shift in disaster management. 3.2 Policy and administration: Importance and principles of disaster management policies, command and coordination of in disaster management, rescue operations-how to start with and how to proceed in due course of time, study of flowchart showing the entire process.	06
4	**Institutional Framework for Disaster Management in India:** 4.1 Importance of public awareness, Preparation and execution of emergency management program. Scope and responsibilities of National Institute of Disaster Management (NIDM) and National disaster management authority (NDMA) in India. Methods and measures to avoid disasters, Management of casualties, set up of emergency facilities, importance of effective communication amongst different agencies in such situations. 4.2 Use of Internet and softwares for effective disaster management. Applications of GIS, Remote sensing and GPS in this regard.	06
5	**Financing Relief Measures:** 5.1 Ways to raise finance for relief expenditure, role of government agencies and NGO's in this process, Legal aspects related to finance raising as wellas overall management of disasters. Various NGO's and the works they have carried out in the past on the occurrence of various disasters, Ways to approach these teams. 5.2 International relief aid agencies and their role in extreme events.	09
6	**Preventive and Mitigation Measures:** 6.1 Pre-disaster, during disaster and post-disaster measures in some events in general 6.2 Structural mapping: Risk mapping, assessment and analysis, sea walls and embankments, Bio shield, shelters, early warning and communication Non Structural Mitigation: Community based disaster preparedness, risk transfer and risk financing, capacity development and training, awareness and education, contingency plans. 6.3 6.4 Do's and don'ts in case of disasters and effective implementation of reliefaids.	06

Course Objectives	• To understand the importance energy security for sustainable development and the fundamentals of energy conservation. • To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management • To relate the data collected during performance evaluation of systems for identification of energy saving opportunities.
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • To identify and describe present state of energy security and its importance. • To identify and describe the basic principles and methodologies adopted in energy audit of a utility. • To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities. • To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities • To analyze the data collected during performance evaluation and recommend energy saving measures

53

Module	Detailed Contents	Hours
1	**Energy Scenario:** Present Energy Scenario, Energy Pricing, Energy Sector Reforms, Energy Security, Energy Conservation and its Importance, Energy Conservation Act- 2001 and its Features. Basics of Energy and its various forms, Material and Energy balance	04
2	**Energy Audit Principles:** Definition, Energy audit- need, Types of energy audit, Energy management (audit) approach-understanding energy costs, Bench marking, Energy performance, Matching energy use to requirement, Maximizing system efficiencies, Optimizing the input energy requirements, Fuel and energy substitution. Elements of monitoring& targeting; Energy audit Instruments; Data and information-analysis. Financial analysis techniques: Simple payback period, NPV, Return on investment (ROI), Internal rate of return (IRR)	08
3	**Energy Management and Energy Conservation in Electrical System:** Electricity billing, Electrical load management and maximum demand Control; Power factor improvement, Energy efficient equipments and appliances, star ratings. **Energy efficiency measures in lighting system, lighting control:** Occupancy sensors, daylight integration, and use of intelligent controllers. Energy conservation opportunities in: water pumps, industrial drives, induction motors, motor retrofitting, soft starters, variable speed drives.	10
4	**Energy Management and Energy Conservation in Thermal Systems:** Review of different thermal loads; Energy conservation opportunities in: Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system. General fuel economy measures in Boilers and furnaces, Waste heat recovery, use of insulation- types and application. HVAC system: Coefficient ofperformance, Capacity, factors affecting Refrigeration and Air Conditioning system performance and savings opportunities.	10
5	**Energy Performance Assessment:** On site Performance evaluation techniques, Case studies based on: Motors and variable speed drive, pumps, HVAC system calculations; Lighting System: Installed Load Efficacy Ratio (ILER) method, Financial Analysis.	04
6	**Energy conservation in Buildings:** Energy Conservation Building Codes (ECBC): Green Building, LEED rating, Application of Non-Conventional and Renewable Energy Sources	03

Course Objectives	• To understand the characteristics of rural Society and the Scope, Nature and Constraints of rural Development • To study Implications of 73rd CAA on Planning, Development and Governance of Rural Areas • An exploration of human values, which go into making a 'good' human being, a 'good' professional, a 'good' society and a 'good life' in the context of work life and the personal life of modern Indian professionals • To understand the Nature and Type of Human Values relevant to Planning Institutions
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Apply knowledge for Rural Development. • Apply knowledge for Management Issues. • Apply knowledge for Initiatives and Strategies • Develop acumen for higher education and research. • Master the art of working in group of different nature. • Develop confidence to take up rural project activities independently

Module	Contents	Hours
1	**Introduction to Rural Development:** Meaning, nature and scope of development; Nature of rural society in India; Hierarchy of settlements; Social, economic and ecological constraints for rural development Roots of Rural Development in India Rural reconstruction and Sarvodaya programme before independence; Impact of voluntary effort and Sarvodaya Movement on rural development; Constitutional direction, directive principles; Panchayati Raj - beginning of planning and community development; National extension services.	08
2	**Post-Independence Rural Development:** Balwant Rai Mehta Committee - three tier system of rural local Government; Need and scope for people's participation and Panchayati Raj; Ashok Mehta Committee - linkage between Panchayati Raj, participation and rural development.	04
3	**Rural Development Initiatives in Five Year Plans:** Five Year Plans and Rural Development; Planning process at National, State, Regional and District levels; Planning, development, implementing and monitoring organizations and agencies; Urban and rural interface - integrated approach and local plans; Development initiatives and their convergence; Special component plan and sub-plan for the weaker section; Micro-eco zones; Data base for local planning; Need for decentralized planning; Sustainable rural development.	06
4	**Post 73rd Amendment Scenario:** 73rd Constitution Amendment Act, including - XI schedule, devolution of powers, functions and finance; Panchayati Raj institutions - organizational linkages; Recent changes in rural local planning; Gram Sabha - revitalized Panchayati Raj; Institutionalization; resource mapping, resource mobilization including social mobilization; Information Technology and rural planning; Need for further amendments.	04
5	Values and Science and Technology Material development and its values; the challenge of science and technology; Values in planning profession, research and education. Types of Values Psychological values — integrated personality; mental health; Societal values — the modern search for a good society; justice, democracy, rule of law, values in the Indian constitution; Aesthetic values — perception and enjoyment of beauty; Moral and ethical values; nature of moral judgment; Spiritual values; different concepts; secular spirituality; Relative and absolute values; Human values— humanism and human values; human rights; human values as freedom, creativity, love and wisdom.	10
6	**Ethics:** Canons of ethics; ethics of virtue; ethics of duty; ethics of responsibility; Work ethics; Professional ethics; Ethics in planning profession, research and education	04

Course Code	Course Name	Credits
BML701	Biomedical Instrumentation- -III	01
Course Objectives	• To understand the basic principles and working of life Saving Equipment. • To develop skills enabling Biomedical Engineers to serve the health care industry • To develop core competency and skill in the field of Biomedical Engineering, to design and develop new health care systems.	
Course Outcomes	**Learner will be able to…** • Design and implement basic Pacemaker circuits. • Design and implement basic oscillator circuits for Surgical Diathermy. • Demonstrate the knowledge of application techniques of physiotherapy machines. • Demonstrate the knowledge of application technique of oximeter	

Syllabus: Same as that of (Course Code) Biomedical Instrumentation- -III (BMI-III)

List of Experiments: (Any Seven)

1. Implementation and testing of basic circuit of pacemaker.
2. Implementation of NAND Gate Oscillator in Surgical Diathermy.
3. Implementation of RLC Over damped system.
4. Implementation of OT lights.
5. Demonstration of Defibrillator.
6. Demonstration of Pacemaker.
7. Demonstration of Surgical Diathermy
8. Demonstration of Ultrasonic Diathermy
9. Demonstration of Nerve and Muscle Stimulator
10. Demonstration of Oximeter.
11. Industry / Hospital visits may be conducted.

Any other experiment based on syllabus which will help learner to understand topic/concept.

Group Presentation on the latest technology in hospitals based on the topics covered in the syllabus.

Assessment:

Term Work:

Term work shall consist of minimum 7 experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments)　　: 10 Marks

Laboratory work (Journal)　　　　: 5 Marks

Presentation　　　　　　　　　　: 5 Marks

Attendance　　　　　　　　　　　 : 5 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Books Recommended:

Text books:

1. Handbook of Biomedical Instrumentation (Third edition): R S. Khandpur. (PH Pub)
2. Medical Instrumentation, Application and Design: J G. Webster. (John Wiley)
3. Biomedical Instrumentation and measurements: Leslie Cromwell, Fred J. Weibell, Enrich A. Pfeiffer. (PHI Pub)

Reference books:

1. Introduction to Biomedical Equipment Technology: Carr –Brown. (PH Pub)
2. Encyclopedia of Medical Devices and Instrumentation: J G. Webster. Vol I- IV (PH Pub)
3. Various Instruments Manuals.
4. Various internet websites.

Oral examination will be based on entire syllabus.

BML702	Machine Learning Lab (ML Lab)	--	--	--	--	--	25	--	--	25	50

Course Code	Course Name	Credits
BMC702	Machine Learning	03
Course Objectives	- To build a strong base in artificial intelligence through algorithm development. - To develop competency in logical thinking, computer programming and knowledge application. - To train and motivate for higher education and research in order to make contribution to state of the art health care for all	
Course Outcomes	**Learner will be able to…** - Understand the fundamental techniques and applications in neural networks, deep learning and machine learning - Understand supervised and unsupervised learning, back propagation and gradient descent algorithms - Understand and implement efficient computational techniques using neural networks, deep learning and machine learning - Design and implementation of neural network models with deep learning and machine learning will be strong base for designing artificial intelligent systems	

Syllabus: Same as that of (BMC702) Machine Learning (ML)

List of Experiments: (Any Seven)

1. Implement the activation functions used in the neural network
2. Implement ANDNOT and XOR function using McCulloch-Pitts neural net
3. Implementation of learning rules for neural network
4. Implementation of backpropagation with gradient descent algorithm neural network
5. Design and implement the neural network model for estimation problem.
6. Design and implement the neural network model for classification problem
7. Optimize the neural network model for estimation problem.
8. Optimize the neural network model for classification problem.
9. Design and implement the neural network model for estimation problem with deep learning
10. Design and implement the neural network model for estimation problem with deep learning

Any other experiment based on syllabus which will help learner to understand topic/concept.

Assessment:

Term Work:

Term work shall consist of minimum 7 experiments. The distribution of marks for term work shall be as follows:

Laboratory work (Experiments): 10 Marks

Laboratory work (Journal) : 10 Marks

Attendance : 05 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Text books

1. Introduction to Machine Learning, 3rd edition, Ethem Alpaydin, PHI Learning Private Limited, New Delhi, 2015
2. Deep Learning by Josh Patterson and Adam Gibson, O'Reilly Media, Inc., Gravenstein Highway North, Sebastopol CA, 2017
3. Neural Networks and Learning Machines Third Edition, Simon Haykin, Pearson, Prentice Hall, 2009

Reference books

1. Machine learning in Action, Peter Harrington, dreamtech Press, New Delhi, 2012
2. Machine learning, Tom M, Mitchell, Mc Graw Hill Education(India) Private Limited New Delhi, 2013

Practical examination will be based on experiments and related topics in the laboratory sessions.

Course Code	Course Name	Teaching scheme			Credits assigned

Course Code	Course Name	Credits
BMDL7011	**Biological Modelling and Simulation Lab**	01
Course Objective	● To understand basic approach of modeling for designing biological model. ● To simulate physiological processes for better understanding. ● To develop competency in terms of logical thinking, programming and application skills ● To train and motivate students for pursuing higher education and research for developing cutting edge technologies.	
Course Outcome	Learner will be able to: ● Apply concept of physiological modelling to model thermometer system. ● Virtually understand biophysical laws for calculation of membrane potential under different equilibrium conditions and develop simulation programs for understanding neuronal functions. ● Simulate mathematical model for the eye movement	

	● Electrically simulate model of thermoregulatory system
	● Understand the usage of, and the assumptions behind biological models

List of Laboratory Experiments (Any Seven)

1. Simulations thermometer system using MATLAB
2. Simulation of Nernst/Goldman Equation using MATLAB((**Two practicals)**)
3. Simulation of eye movement using MATLAB
4. Simulation using HHSim **(Two practicals)**
5. Simulation using Neurons in Action **(Two practicals)**
6. Developing a model of a neuron using NEURON
7. Electrical simulation of thermoregulatory model

Any other experiment / assignment / presentation based on syllabus which will help students to understand topic/concept.

Assessment:

Term Work:

Term work shall consist of minimum 7 experiments.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments)   :

10 Marks Laboratory work (Journal)   :

10 Marks

Attendance   : 5 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Books Recommended:

 Text Books:

1. Bioengineering, Biomedical, Medical and Clinical Engg.: A.Teri Bahil.
2. Signals and systems in Biomedical Engg.: Suresh R Devasahayam.
3. Bio-Electricity A quantitative approach by Barr and Ploncey

Reference Books:

1.   Biomedical Engineering Handbook by Bronzino (CRC Press)

Oral examination will be based on entire syllabus.

Course Objectives	• The course introduces the students to the field of Bioinformatics. • To make students aware about the methods to characterise and manage the different types of biological data. • To introduce students to the basics of sequence alignment and analysis.	
Course Outcomes	**Learner will be able to** • Get introduced to the basic concepts of Bioinformatics and its significance in Biological data analysis. • Apply knowledge of basic principles of mathematics and statistics. • Apply existing software effectively to extract information from large databases and to use this information in computer modelling • Apply problem-solving skills to multivariate methods in bioinformatics Search and apply bioinformatics tools to analyse and interpret biological data	

Syllabus: Same as that of BMDO7012 Bioinformatics

University of Mumbai, Biomedical Engineering, Rev 2022-23

List of Tutorials: (any seven Tutorials based on following topics)
1. Steps in DNA sequencing
2. Different methods of DNA sequencing
3. Discovery of Gene Sequence.
4. Types of Proteomics
5. Mendel's postulates and laws of inheritance
6. Steps of dynamic programming
7. Classification of biological databases
8. Steps in Hypothesis Testing
9. Types of statistical models
10. Important Algorithms in Bioinformatics

Any other tutorial based on syllabus may be included, which would help the learner to understand topic/concept.
A power point presentation on any of the topics in syllabus should be carried out.

Assessment:
Term Work:

Term work shall consist of minimum 7 tutorials.
The distribution of marks for term work shall be as follows:
Laboratory work (Tutorials)   : 10 Marks
Presentation   : 10 Marks
Attendance   : 5 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Books Recommended:

Text books:
1. Basics of Bioinformatics, Rui Jiang, Xuegong Zhang, Michael Q. Zhang, Springer, E-book.
2. Introduction to Bioinformatics, Arthur M. Lesk, Oxford University Press, 2002, First Edition.

Reference Books:
1. Essential Bioinformatics, Jin Xiong, Cambridge University Press, 2006, First Edition.

Oral examination will be based on entire syllabus.

List of Experiments: (any seven Experiments based on following list)

1) To demonstrate I/O operations, interrupts, ADC and other onboard features using any one hardware platform (Arduino/Raspberry Pi/BeagleBone/ESP32).

2) To demonstrate interfacing various sensors and storing data on-board [and on-board processing of data] using any one hardware platform (Arduino/Raspberry Pi/BeagleBone/ESP32).

3) To demonstrate interfacing various sensors and communicating data using Internet using any one hardware platform (Arduino/Raspberry Pi/BeagleBone/ESP32).

4) To demonstrate CoAP protocol (client – server model) with SOC platform as server.

5) To demonstrate CoAP protocol (client – server model) with SOC platform as client.

6) To demonstrate MQTT broker (publish - subscribe model) with SOC platform as broker.

7) To demonstrate MQTT broker (publish - subscribe model) with SOC platform as publisher.

8) To demonstrate the use of cloud storage.

9) To demonstrate the use/role of cloud computing.

Any other Experiment based on syllabus may be included, which would help the learner to understand topic/concept.

Assessment:

Term Work:

Term work shall consist of minimum 7 tutorials.
The distribution of marks for term work shall be as follows:
Laboratory work (Tutorials)   : 10 Marks
Presentation   : 10 Marks
Attendance   : 05 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Books Recommended:

Books Recommended:

Text books:

BMP 701	Major Project - I	--	--	--	--	25	--	25	--	50

Course Code	Course Name	Credits
BMP701	Major Project-I	03
Course objective	• To apply the knowledge gained during Curriculum to develop and design problem statement. • Conduct literature survey. • Design Circuit/ Flow chart of the statement. • Documentation and project report writing.	
Course Outcome	**Learner will be able to** • Review literature to define problem statement • Apply knowledge of the engineering fundamentals acquired during the curriculum and beyond • Develop and create design using appropriate design methodologies considering the various health, society and environmental needs. • Write problem statement, Design concept in prescribed format. • Learn the behavioral science by working in a group.	

Project Guidelines:

1. Learner is allotted 6 hrs per week for the project work
2. Learners should carry out literature survey /visit industry / analyze current trends and identify the problem for Project and finalize in consultation with Guide/Supervisor.
3. Group of maximum four students will be completing a comprehensive project work.
4. Learners should use multiple literatures and understand the problem.
5. Learners should attempt solution to the problem by experimental/simulation methods.
6. The solution to be validated with proper justification and compile the report in standard form
7. Learner may use this opportunity to learn different computational techniques as well as some model development.

Faculty Load:
1. In semester VII – 1/2 (half) period of 1/2 hour per week per project group
2. Each faculty is permitted to take (guide) maximum 4 (Four) project groups

Assessment:

Term Work:

Term Work should be examined by approved internal faculty appointed by the head of the institute based on the following:

- Scope and objective of the project work.
- Extensive Literature survey.
- Progress of the work (Continuous assessment)
- Report in prescribed University format.

Guidelines for Assessment of Project Stage- I
1. Project I should be assessed through a presentation jointly by Internal and External Examiners approved by the University of Mumbai
2. Project stage I should be assessed based on following points
   - Quality of problem selected
   - Literature Survey
   - Clarity of Problem definition and Feasibility of problem solution
   - Relevance to the specialization / Industrial trends
   - Clarity of objective and scope
   - Quality of Project Design
   - Compilation of Project Report
   - Quality of Written and Oral Presentation

Course Code	Course Name	Credits
BMC801	**Hospital Management**	03
Course Objectives	• To understand the basic principles used for designing of various departments in the hospital. • To understand the role of Biomedical Engineer in hospital and basic develop skills enabling to serve hospitals. • To understand the overall functioning of various departments in the hospital.	
Course Outcomes	**Learner will be able to…** • Apply the management concepts used specifically in hospital. • Explain the management structure and its functions in hospital. • Demonstrate the knowledge about the principles of designing and commissioning of clinical services in the hospital. • Demonstrate the knowledge about the roles and responsibilities of Biomedical Engineer in hospital. • Demonstrate the knowledge about the functions of other Engineering and auxiliary services in the hospital. • Apply environment and waste management concepts in healthcare industry.	

Module	Contents	Hours
1	**Process of management:** Principles of management, leadership, motivation, time management, H.R. management (recruitment, performance appraisal, training and development,), effective communication, accounting - types of Budget.	**07**
2	**Organization of the hospital and hospital planning:** Management structure, types of hospitals, governing body, hospital committee and hospital functionaries, duties and responsibilities of various positions. Guiding principles in planning hospital facilities and services and planning the hospital building	**04**
3	**Clinical services: (Location, layout, equipment, personnel, and functions):** OUT patient, IN patient (wards), intensive care, pathology laboratory & blood bank, radiology, physiotherapy, surgical operation theatre, emergency (casualty).	**10**
4	**Biomedical engineering department: (Location, layout, equipment, personnel, and its main functions)** Roles and responsibilities of a biomedical engineer in hospitals, Equipment management: maintenance types: routine(preventive) and breakdown, maintenance contracts (CMC and AMC) Purchase management: Purchase system (centralized, decentralized, localpurchase), types of purchase, purchase procedures: selection of suppliers, tendering procedures, analyzing bids, price negotiations Material's (store) management: Functions of store manager, materials handling, flow of goods/FIFO, inventory control**:** lead-time, buffer stock, reorder level, two bin system, EOQ	**09**
5	**Other engineering services:** Engineering services (electrical, mechanical and civil): responsibilities and functions. Hospital ventilation and air conditioning, medical gas system, hospital information system.	**05**
6	**Environment and waste management:** Hospital infection control, central sterile service department (CSSD), biomedical waste management, disaster management.	**04**

Assessment:

      Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Text Books:
1. Hospital Management by Dr. Pradyna Pai
2. Hospital Planning, Designing and Management: Kunders G D, Gopinath, A katakam (Private Pub Bangalore)

Reference Books:

Course Objectives	• To make the learner aware of fundamental concepts of Robotics • To make learner study direct and Inverse Kinematics of Robots • To make learner know the Trajectory and Motion planning. • To make the learner know the Biomedical applications of robotics	
Course Outcomes	**Learner will be able to…** • To describe direct and inverse kinematics of robots. • To describe workspace envelop and trajectory planning for robots • To apply various image processing tools for robotic manipulation • To implement motion planning solutions using various algorithms • To illustrate medical applications of robots	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module No.	Contents	Hours
1	**Introduction:** Automation and robots, classification, application, specification and notations.	**04**
2	**Direct Kinematics:** Dot and cross products, co-ordinate frames, rotations, homogeneous coordinates, link co-ordinates, arm equation and arm matrix derivation (two axis, three axis and four axis SCARA), configuration of five axis and six axis robots (arm matrix derivation and equation not expected)	**10**
3	**Inverse kinematics:** General properties of solutions of inverse kinematics, methods for finding solution, tool configuration vector and inverse kinematics solution for two axis, three axis and four axis robots. Workspace analysis, work envelope and examples, workspace fixtures, trajectory planning, pick and place operations, continuous path motion, interpolated motion, straight-line motion.	**08**
4	**Robot vision:** Image representation, template matching, polyhedral objects, shane analysis, segmentation (thresholding, region labelling, shrink operators, swell operators, Euler numbers, perspective transformation, structured illumination, cameracalibration).	**06**
5	**Task planning:** Task level programming, uncertainty, configuration, space, gross motion, planning, Grasp planning, fine-motion planning, simulation of planar motion,source and goal scenes, task planner simulation.	**06**
6	**Applications in biomedical engineering:** Application in rehabilitation: clinical and surgery	**05**

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Course Objectives	• To understand the healthcare interoperability semantic and syntactic. • To understand the standards of healthcare interoperability standards for Medical Images and Medical Messages.	
Course Outcomes	**Learners will be able to:** • Understand Healthcare interoperability standards • Fabricate HL7 Messages • Understand and Design UML Diagrams • Understand semantic interoperability through DICOM • Edit and Compare DICOM file	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module	Contents	Hours
1.	**Healthcare interoperability:** Standards in healthcare system, categorizing standards, standard development, various healthcare informatics standards, need for a Lingua Franca, electronichealth records, interoperability modelling basics.	05
2.	**HL7 Version 2 (Part-I)** Message syntax, delimiters, segment definition, message header MSH, patient identification details (PID), patient visit (PV1), request and specimen details (OBR), result details (OBX).	04
3.	**HL7 Version 2 (Part-II)** Z-Segments, data, simple data types, complex data types, codes and identifiers, names and addresses, other complex data types.	04
4.	**DICOM standard:** Introduction, DICOM Grammar: VRs, DICOM data dictionary, DICOM objects, DICOM information hierarchy, modules, IODs and IEs.	07
5.	**DICOM Communications:** DICOM SOPs, unit identification on n/w, services and data, DIMSE Example: C-Echo, storage, query: find, C-Find IOD, C-Find DIMSE, C-Cancel, modality Worklist, Basic DICOM retrieval: C-Get, advanced DICOM retrieval: C-Move, DICOM: ping, push and pull.	09
6.	**DICOM Associations** Association establishment, transfer syntax, application context, **DICOM Media: Files, Folders, and DICOMDIRs** DICOM File format, DICOM file services, storing DICOM data in PACS.	10

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Course Objectives	• To understand basics of Artificial Intelligence, Intelligent Agents. • To conceptualize search techniques. • To understand exert system in Artificial Intelligence	
Course Outcomes	**Learner will be able to…** • Develop a basic understanding of intelligent agents in artificial intelligence • Choose an appropriate problem-solving method and knowledge representation technique • Comprehend the concept of propositional logic • Understand Reasoning and Knowledge Representation • Develop basic understanding of expert system and it's applications • Learn AI applications in health care	

Module	Contents	Hours
1	**Basics of Artificial Intelligent:** Definition and concept of Artificial Intelligence, stages of AI, intelligent agents in artificial intelligence, foundations of AI and applications, current trends in AI	**04**
2	**Problem Spaces, and Search:** Breadth first search, depth first search techniques, iterative deepening, bidirectional search, best first search, Heuristic search, Hill Climbing, A* Search, **Problem reduction and game playing:** Introduction, problem reduction, game playing, alphabeta pruning, two-player perfect information games	**10**
3	**Logic concepts:** Introduction, propositional calculus, propositional logic, natural deduction system, axiomatic system, semantic tableau system in proportional logic, resolution refutation in proportional logic, predicate logic	**07**
4	**Knowledge Representation:** Problems in representing knowledge, knowledge representation using propositional and predicate logic, logical consequences, syntax and semantics of an expression, semantic Tableau. Forward and backward reasoning. Proof methods, substitution and unification, conversion to clausal form, normal forms, resolution, refutation, deduction, theorem proving, inferencing, monotonic and non-monotonic reasoning.	**08**
5	**Expert system and applications:** Introduction phases in building expert systems, expert system versus traditional systems, rule-based expert systems blackboard systems truth maintenance systems, application of expert systems	**06**
6	**AI in Healthcare:** Benefits of AI in medicine, AI and Medical visualization, Medical Expert system, Applying AI to EHR Data, Artificial Intelligence in Medical Imaging	**04**

Course Objectives	- To understand various fabrication techniques for MEMS devices. - To apply the knowledge of MEMS in Biomedical field. - To understand recent advancements in Biomedical Engineering for a successful career in the area of nanotechnology.	
Course Outcomes	**Learner will be able to…** - Understand basic property and select appropriate material for MEMS application - Develop or modify the MEMS processes for a simple MEMS device in order to reduce the fabrication time. - Understand different microfabrication techniques and choose appropriate technique - Analyse Micro total analysis system with designing of its components - Demonstrate working principles of Bio Nano-sensors and drug delivery devices with types and fabrication - Understand packaging techniques used in MEMS	

Module	Contents	Hours
1.	**Introduction to miniaturization:**	**06**
	• Difference between Microelectronics and MEMs, Block diagram of MEMS and BIOMEMS, examples. Introduction to generalised processes used. • Clean room: definition, classification, air flow system • Safety in handling hazardous materials in clean room • Scaling Laws in Miniaturization • Substrates and Wafers: CZ process and float zone process, Wafer types • Materials: Properties and applications of single crystal silicon, SiO_2, Si_3N_4, SiC, Polysilicon, Glass • Wafer cleaning processes: RCA, Piranha • Positive and negative photoresist, mask, material properties of PMMA, SU8 • Different projection systems, • Surface characterization techniques: AFM, SEM, TEM, Ellipsometer, Profilometer	
2.	**MEMS Fabrication Processes**	**07**
	• Photolithography: Definition, steps, light sources (UV, DUV, EUV) • PVD: definition, types: Evaporation (Thermal and E-beam) and Sputtering (DC and RF), advantages, disadvantages, Material properties of Al • CVD: definition, reaction steps, types: APCVD, LPCVD, PECVD, and HWCVD, advantages, disadvantages • Oxidation: Thermal • Polymers coating techniques: spinning, spraying and electrodeposition • Doping: definition, types: Ion implantation and Diffusion, advantages, disadvantages • Etching: types: Dry etching (RIE, DRIE) and wet etching (isotropic and anisotropic), advantages, disadvantages, specific etchants	
3.	**Microfabrication Techniques**	**07**
	• Bulk micromachining: definition, advantages and disadvantages, Examples: pressure sensor, dissolved wafer process • Surface micromachining: definition, advantages and disadvantages Examples: pressure sensor, cantilever • Non polysilicon surface micromachining: SOI fabrication • LIGA: definition, process steps, examples, advantages and disadvantages • X-ray lithography: Synchrotron radiation, X-ray mask • Molding techniques: Injection, compression, hot embossing • Soft lithography: Definition, SAMs, Types: Micro Contact Printing, Material properties of PDMS, Gold, Conducting polymers • Micro molding techniques: Replica molding, Microtransfer molding, Micromolding in capillaries and Solvent-assisted micromolding	
4.	**MICRO TOTAL ANALYSIS SYSTEMS (μTAS)**	**07**
	• Flow techniques in μ-fluidics: pressure driven force, electro-osmosis, electrophoresis • Micropump, microvalves: types and fabrication • Microchannels: Types and fabrication (SU8, glass, silicon)	

	• Separation techniques: capillary electropherosis, electrochromatography, isoelectric focusing • Detection techniques: fluorescence, chemiluminiscence	
5.	**MICRO/ NANO BIOSENSORS AND DRUG DELIVERY DEVICES** • Biosensor: definition, block diagram • Classification based on the basis of detection techniques: electric, magnetic, optical, thermal, mechanical, and chemical • Basic steps involved in the development of biosensors: surface modification, immobilization, integration with transducer • Design, fabrication of cantilever for antibody detection • Hypodermic needles, transdermal patches: disadvantages • Micro needles: solid, hollow, polymer, silicon (fabrication) • Nano particles for drug delivery	**06**
6	**MICROSYSTEM PACKAGING** • Packaging materials • Levels of packaging • Comparison between IC and MEMS packaging • Packaging technologies: Die preparation, surface bonding, wire bonding, sealing • Pressure sensor packaging	**06**

Assessment:

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Text Books:

1. MEMS & MICROSYSTEMS Design and Manufacture, Tai-Ran Hsu, TATA McGraw-Hill.
2. Fundamentals of Microfabrication, Marc Madou, CRC Press.

Reference Books:

1. Fundamentals of BioMEMS and Medical Microdevices, Steven S. Saliterman, (SPIE Press Monograph Vol. PM153 by Wiley Interscience
2. Microsystem Technology", W. Menz, J. Mohr, 0. Paul, WILEY-VCH, ISBN 3. 527-29634-4
3. Electro Mechanical System Design", James J. Allen, Taylor & Francis Group, LLC, ISBN-0-8247 -5824-2, 2005
4. MICROSYSTEM DESIGN, Stephen D. Senturia, KLUWER ACADEMIC PUBLISHERS, eBook ISBN: 0-306-47601-0

Theory Examination:

1. Question paper will comprise of total 06 questions, each carrying 20 marks.
2. Total 04 questions need to be solved.
3. Question No: 01 will be compulsory and based on entire syllabus wherein sub-questions of marks will be asked.
4. Remaining questions will be randomly selected from all the modules depending the weightage.

Course Code	Course Name	Teaching scheme			Credit assigned

Course Code	Course Name	Credits
BMDO8022	**Medical Devices Regulations**	03

Course Objectives	• To familiarize the learners with the regulatory aspects of medical devices and instruments. • To keep the learners abreast with the technological developments in the field of Medical devices regulatory affairs.

Course Outcomes	Learner will be able to: • Discuss credibility & authorities of approvals, medical devices life cycle, risk based classification and risk based approach for regulatory controls. • Explain principles of safety and effectiveness, quality management system, Various standards (American, European, BIS), risk management, cyber security and clinical evaluation. • Describe technical documentation required by regulators, essential requirements checklist, risk management summary report, manufacturing information, regulated product submissions and regulatory submission repository. • Highlight premarket phase like design controls, information management during premarket phase, R&D planning stage, design & development process stage and product identification & traceability. • Perform regulatory submissions, approvals and registration. • Launch the product, do post market surveillance, look after product obsolescence, oversee quality management system and regulatory system & processes.

Module	Contents	Hours
1.	**Overview of regulatory framework for medical devices:** Credibility and authority of approvals, medical devices life cycle, risk-based classification, risk-based approach for regulatory controls. Introduction to International Regulatory Requirements & Device Pathways.	07
2.	**Safety & Effectiveness:** Principles of safety and effectiveness, Quality management system, Standards, Risk management, Cybersecurity, Clinical evaluation. Classification of Biomedical Instruments, based on safety standards, Approach to Bioethics	07
3.	**Technical Documentation:** Technical documentation required by regulators, Essential requirements checklist, Risk management summary report, Manufacturing information, Regulated product submissions, Regulatory submission repository	07
4.	**Premarket phase:** Design controls, Information management during premarket phase, R&D planning stage, Design & development process stage, product identification & traceability, Case study	06
5.	**Regulatory submissions, approvals and registration**: Administrative provisions, regulatory submission and approval, International scenario	06
6.	**Post market phase:** Product launch, continued regulatory compliance, Post market surveillance, Product obsolescence, Quality management system, Regulatory system, and processes. Types of medical device audits. Medical device Compliance Audit	06

Internal Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Books Recommended:

Textbooks:

Course Code	Course Name	Credits
BMDO8023	Ergonomics	03
Course Objectives	• To understand various fabrication techniques for MEMS devices. • To apply the knowledge of MEMS in Biomedical field. • To understand recent advancements in Biomedical Engineering for a successful career in the area of nanotechnology.	
Course Outcomes	**Learner will be able to…** • Understand basic property and select appropriate material for MEMS application • Develop or modify the MEMS processes for a simple MEMS device in order to reduce the fabrication time. • Understand different microfabrication techniques and choose appropriate technique • Analyse Micro total analysis system with designing of its components • Demonstrate working principles of Bio Nano-sensors and drug delivery devices with types and fabrication • Understand packaging techniques used in MEMS	

University of Mumbai, Biomedical Engineering, Rev 2022-23

Module	Contents	Hours
1.	**Introduction to Ergonomics** • Definition of Ergonomics and its application and overview. • Ergonomics in systems design, and steps to performing a task analysis. In class practice performing a task analysis.	08
2.	**Design Man Machine Environment System Design** • Overview of Human body and its sub systems. • Understanding musculoskeletal system and its function in terms of manual activities • Understanding nervous system, human sensory organs and their limitations. • Basic Bio mechanics and its application in design	09
3.	**Muscle Use and Anthropometry and Workspace** • Anthropometry and its application • Issues of cognition, perception and performance. • Study of work posture and its impact on human performance. • Physical environment and their impact on human performance • Muscular work including dynamic and static work, nervous control of movement, skilled work and ways to improve work efficiency. • Use of anthropometric data in ergonomics. • Principles of workspace design, including seated work, standing work, work reaches and working heights, the office environment and visual work	10
4.	**Occupational stress and Musculoskeletal disorders; Safety and health issues Cognitive aspects of user-system interaction:** • Perception, information processing, user behaviour, error and risk perception;	04
5.	**Principles of human factors in visual communication** • Visual display in different planes- static shape, size, font type and dynamic characters of display	04
6	**Environmental factors influencing human performance** • Participatory ergonomics aspects	04

Assessment:

Course Objectives	• To familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques. • To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure.
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Apply selection criteria and select an appropriate project from different options. • Write work break down structure for a project and develop a schedule based on it. • Identify opportunities and threats to the project and decide an approach to deal with them strategically. • Use Earned value technique and determine & predict status of the project. • Capture lessons learned during project phases and document them for future reference

Module	Detailed Contents	Hours
1	**Project Management Foundation:** Definition of a project, Project Vs Operations, Necessity of project management, Triple constraints, Project life cycles (typical & atypical) Project phases and stage gate process. Role of project manager, Negotiations and resolving conflicts, Project management in various organization structures, PM knowledge areas as per Project Management Institute (PMI)	05
2	**Initiating Projects:** How to get a project started, selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter; Project proposal. Effective project team, Stages of team development & growth (forming, storming, norming &performing), team dynamics.	06
3	**Project Planning and Scheduling:** Work Breakdown structure (WBS) and linear responsibility chart, Interface; Co-ordination and concurrent engineering, Project cost estimation and budgeting, Top down and bottoms up budgeting, Networking and Scheduling techniques. PERT, CPM, GANTT chart, Introduction to Project Management Information System (PMIS).	08

4	**Planning Projects:** Crashing project time, Resource loading and levelling, Goldratt's critical chain, Project Stakeholders and Communication plan Risk Management in projects: Risk management planning, Risk identification and risk register, Qualitative and quantitative risk assessment, Probability and impact matrix. Risk response strategies for positive and negative risks	06
5	**5.1 Executing Projects:** Planning monitoring and controlling cycle, Information needs and reporting, engaging with all stakeholders of the projects, Team management,communication and project meetings **5.2 Monitoring and Controlling Projects:** Earned Value Management techniques for measuring value of work completed; Using milestones for measurement; change requests and scope creep, Project audit **5.3 Project Contracting** Project procurement management, contracting and outsourcing,	08
6	**6.1 Project Leadership and Ethics:** Introduction to project leadership, ethics in projects, Multicultural and virtual projects **6.2 Closing the Project:** Customer acceptance; Reasons of project termination, Various types of project terminations (Extinction, Addition, Integration, Starvation), Process of project termination, completing a final report; doing a lessons learned analysis; acknowledging successes and failures; Project management templates and other resources; Managing without authority; Areas of further study.	06

Assessment:

Internal Assessment for 20 marks:

Consisting **Two Compulsory Class Tests**

First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:

Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions**, **each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then, part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved**

Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Understand Indian finance system and corporate finance • Take investment, finance as well as dividend decisions

Module	Detailed Contents	Hours
1	**Overview of Indian Financial System:** Characteristics, Components and Functions of Financial System. **Financial Instruments:** Meaning, Characteristics and Classification of Basic Financial Instruments — Equity Shares, Preference Shares, Bonds-Debentures, Certificates of Deposit, and Treasury Bills. **Financial Markets:** Meaning, Characteristics and Classification of Financial Markets — Capital Market, Money Market and Foreign Currency Market **Financial Institutions:** Meaning, Characteristics and Classification of Financial Institutions — Commercial Banks, Investment-Merchant Banks and Stock Exchanges	06
2	**Concepts of Returns and Risks:** Measurement of Historical Returns and Expected Returns of a Single Security and a Two-security Portfolio; Measurement of Historical Risk and Expected Risk of a Single Security and a Two-security Portfolio. **Time Value of Money:** Future Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Present Value of a Lump Sum, Ordinary Annuity, and Annuity Due; Continuous Compounding and Continuous Discounting.	06

3	**Overview of Corporate Finance:** Objectives of Corporate Finance; Functions of Corporate Finance—Investment Decision, Financing Decision, and Dividend Decision. **Financial Ratio Analysis:** Overview of Financial Statements—Balance Sheet, Profit and Loss Account, and Cash Flow Statement; Purpose of Financial Ratio Analysis; Liquidity Ratios; Efficiency or Activity Ratios; Profitability Ratios; Capital Structure Ratios; Stock Market Ratios; Limitations of Ratio Analysis.	09
4	**Capital Budgeting:** Meaning and Importance of Capital Budgeting; Inputs for Capital Budgeting Decisions; Investment Appraisal Criterion—Accounting Rate of Return, Payback Period, Discounted Payback Period, Net Present Value(NPV), Profitability Index, Internal Rate of Return (IRR), and Modified Internal Rate of Return (MIRR) **Working Capital Management:** Concepts of Meaning Working Capital; Importance of Working Capital Management; Factors Affecting an Entity's Working Capital Needs; Estimation of Working Capital Requirements; Management of Inventories; Management of Receivables; and Management of Cash and Marketable Securities.	10
5	**Sources of Finance:** Long Term Sources—Equity, Debt, and Hybrids; Mezzanine Finance; Sources of Short Term Finance—Trade Credit, Bank Finance, Commercial Paper; Project Finance. **Capital Structure:** Factors Affecting an Entity's Capital Structure; Overview of Capital Structure Theories and Approaches— Net Income Approach, Net Operating Income Approach; Traditional Approach, and Modigliani-Miller Approach. Relation between Capital Structure and Corporate Value; Concept of Optimal Capital Structure	05
06	**Dividend Policy:** Meaning and Importance of Dividend Policy; Factors Affecting an Entity's Dividend Decision; Overview of Dividend Policy Theories and Approaches— Gordon's Approach, Walter's Approach, and Modigliani-Miller Approach	03

Course Objectives	• To introduce the students with basic concepts, techniques and practices of the human resource management • To provide opportunity of learning Human resource management (HRM) processes, related with the functions, and challenges in the emerging perspective of today's organizations • To familiarize the students about the latest developments, trends & different aspects of HRM • To acquaint the student with the importance of inter-personal & inter-group behavioural skills in an organizational setting required for future stable engineers, leaders and managers
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Understand the concepts, aspects, techniques and practices of the human resource management. • Understand the Human resource management (HRM) processes, functions, changes and challenges in today's emerging organizational perspective. • Gain knowledge about the latest developments and trends in HRM. • Apply the knowledge of behavioural skills learnt and integrate it with in inter personal and intergroup environment emerging as future stable engineers and managers.

Module	Detailed Contents	Hours
1	**Introduction to HR** • Human Resource Management- Concept, Scope and Importance, Interdisciplinary Approach Relationship with other Sciences, Competencies of HR Manager, HRM functions • Human resource development (HRD): changing role of HRM – Human resource Planning, Technological change, Restructuring and rightsizing, Empowerment, TQM, Managing ethical issues	05
2	**Organizational Behaviour (OB)** • Introduction to OB Origin, Nature and Scope of Organizational Behaviour, Relevance to Organizational Effectiveness and Contemporary issues	07

	• Personality: Meaning and Determinants of Personality, Personality development, Personality Types, Assessment of Personality Traits for Increasing SelfAwareness • Perception: Attitude and Value, Effect of perception on Individual Decision-making, Attitude and Behaviour • Motivation: Theories of Motivation and their Applications for Behavioural Change (Maslow, Herzberg, McGregor); • Group Behaviour and Group Dynamics: Work groups formal and informal groups and stages of group development, Team Effectiveness: High performing teams, Team Roles, cross functional and self-directed team. Case study	
3	**Organizational Structure &Design** • Structure, size, technology, Environment of organization; Organizational Roles & conflicts: Concept of roles; role dynamics; role conflicts and stress. • Leadership: Concepts and skills of leadership, Leadership and managerial roles, Leadership styles and contemporary issues in leadership. • Power and Politics: Sources and uses of power; Politics at workplace, Tactics and strategies.	06
4	**Human resource Planning** • Recruitment and Selection process, Job-enrichment, Empowerment – Job Satisfaction, employee morale • Performance Appraisal Systems: Traditional & modern methods, Performance Counselling, Career Planning Training & Development: Identification of Training Needs, Training Methods	05
5	**Emerging Trends in HR** • Organizational development; Business Process Re-engineering (BPR), BPR as a tool for organizational development, managing processes & transformation in HR. Organizational Change, Culture, Environment • Cross Cultural Leadership and Decision Making**:** Cross Cultural Communication and diversity at work**,** Causes of diversity, managing diversity with special reference to handicapped, women and ageing people, intra company cultural difference in employee motivation	06
6	**HR & MIS:** Need, purpose, objective and role of information system in HR, Applications in HRD in various industries (e.g. manufacturing R&D, Public Transport, Hospitals, Hotels and service industries **Strategic HRM:** Role of Strategic HRM in the modern business world, Concept of Strategy, Strategic Management Process, Approaches to Strategic Decision Making; Strategic Intent – Corporate Mission, Vision, Objectives and Goals **Labor Laws & Industrial Relations:** Evolution of IR, IR issues in organizations, Overview of Labor Laws in India; Industrial Disputes Act, Trade Unions Act, Shops and Establishments Act	10

ILO8025	**Professional Ethics and Corporate Social Responsibility (CSR)**	**20**	**20**	**20**	**80**	**3**	**--**	**--**	**100**

Course Objectives	• To understand professional ethics in business • To recognized corporate social responsibility
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • Understand rights and duties of business • Distinguish different aspects of corporate social responsibility • Demonstrate professional ethics • Understand legal aspects of corporate social responsibility

Module	Detailed Contents	Hours
1	**Professional Ethics and Business:** The Nature of Business Ethics; Ethical Issues in Business; Moral Responsibility and Blame; Utilitarianism: Weighing Social Costs and Benefits; Rights and Duties of Business	04
2	**Professional Ethics in the Marketplace:** Perfect Competition; Monopoly Competition; Oligopolistic Competition; Oligopolies and Public Policy **Professional Ethics and the Environment:** Dimensions of Pollution and Resource Depletion; Ethics of Pollution Control; Ethics of Conserving Depletable Resources	08
3	**Professional Ethics of Consumer Protection:** Markets and Consumer Protection; Contract View of Business Firm's Duties to Consumers; Due Care Theory; Advertising Ethics; Consumer Privacy **Professional Ethics of Job Discrimination:** Nature of Job Discrimination; Extent of Discrimination; Reservation of Jobs.	06

4	**Introduction to Corporate Social Responsibility:** Potential BusinessBenefits— Triple bottom line, Human resources, Risk management, Supplier relations; Criticisms and concerns—Nature of business; Motives; Misdirection. Trajectory of Corporate Social Responsibility in India	05
5	**Corporate Social Responsibility:** Articulation of Gandhian Trusteeship Corporate Social Responsibility and Small and Medium Enterprises (SMEs) in India, Corporate Social Responsibility and Public-Private Partnership (PPP) in India	08
6	**Corporate Social Responsibility in Globalizing India:** Corporate Social Responsibility Voluntary Guidelines, 2009 issued by the Ministry of Corporate Affairs, Government of India, Legal Aspects of Corporate Social Responsibility— Companies Act, 2013.	08

4. Corporate Social Responsibility in India (2015) by Bidyut Chakrabarty, Routledge, New Delhi.

Assessment:

Internal Assessment for 20 marks:
Consisting **Two Compulsory Class Tests**
First test based on approximately 40% of contents and second test based on remaining contents (approximately 40% but excluding contents covered in Test I)

End Semester Examination:
Weightage of each module in end semester examination will be proportional to number of respective lecture hours mentioned in the curriculum.

1. Question paper will comprise of total **six questions**, **each carrying 20 marks**
2. **Question 1** will be **compulsory** and should **cover maximum contents of the curriculum**
3. **Remaining questions will be mixed in nature** (for example if Q.2 has part (a) from module 3 then, part (b) will be from any module other than module 3)
4. Only **Four questions need to be solved**.

ILO8027	**IPR and Patenting**	**20**	**20**	**20**	**80**	**3**	**--**	**--**	**100**

Course Objectives	• To understand intellectual property rights protection system • To promote the knowledge of Intellectual Property Laws of India as well as International treaty procedures • To get acquaintance with Patent search and patent filing procedure and applications
Course Outcomes	**Upon successful completion of this course, the learner will be able to:** • understand Intellectual Property assets • assist individuals and organizations in capacity building • work for development, promotion, protection, compliance, and enforcement of Intellectual Property and Patenting

Module	Detailed Contents	Hours
01	**Introduction to Intellectual Property Rights (IPR)**: Meaning of IPR, Different category of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Plant variety protection, Geographical indications, Transfer of technology etc. **Importance of IPR in Modern Global Economic Environment:** Theories of IPR, Philosophical aspects of IPR laws, Need for IPR, IPR as an instrument of development	05
02	**Enforcement of Intellectual Property Rights:** Introduction, Magnitude of problem, Factors that create and sustain counterfeiting/piracy, International agreements, International organizations (e.g. WIPO, WTO) active in IPR enforcement **Indian Scenario of IPR:** Introduction, History of IPR in India, Overview of IP laws in India, Indian IPR, Administrative Machinery, Major international treaties signed by India, Procedure for submitting patent and Enforcement of IPR at national level etc.	07
03	**Emerging Issues in IPR:** Challenges for IP in digital economy, e-commerce, human genome, biodiversity and traditional knowledge etc.	05

04	**Basics of Patents:** Definition of Patents, Conditions of patentability, Patentable and non-patentable inventions, Types of patent applications (e.g. Patent of addition etc.), Process Patent and Product Patent, Precautions while patenting, Patent specification Patent claims, Disclosures and non-disclosures, Patent rights and infringement, Method of getting a patent	07
05	**Patent Rules:** Indian patent act, European scenario, US scenario, Australia scenario, Japan scenario, Chinese scenario, Multilateral treaties where India is a member (TRIPS agreement, Paris convention etc.)	08
06	**Procedure for Filing a Patent (National and International):** Legislation and Salient Features, Patent Search, Drafting and Filing Patent Applications, Processing of patent, Patent Litigation, Patent Publication, Time frame and cost, Patent Licensing, Patent Infringement **Patent databases:** Important websites, Searching international databases	07

BML801	Hospital Management	01
Course Objectives	• To understand the basic principles used for designing of various departments in the hospital. • To understand the role of Biomedical Engineer in hospital and basic develop skills enabling to serve hospitals. • To understand the overall functioning of various departments in the hospital.	
Course Outcomes	**Learner will be able to…** • Apply the management concepts used specifically in hospital. • Explain the management structure and its functions in hospital. • Demonstrate the knowledge about the principles of designing and commissioning of clinical services in the hospital. • Demonstrate the knowledge about the roles and responsibilities of Biomedical Engineer in hospital. • Demonstrate the knowledge about the functions of other Engineering and auxiliary services in the hospital. • Apply environment and waste management concepts in healthcare industry.	

Syllabus: Same as that of BMC801 Hospital Management (HM).

List of Experiments and Assignments: (Any Four Experiments and Any Four Assignments)

1. Design of Registration form of hospital.
2. Prepare an organization chart for multi-speciality hospital
3. Prepare budget using EXCEL sheet for purchase of hospital equipment.
4. Preparation of Comparative Statement in Excel for purchase of medical equipment. (**Any Two**)
5. Design the layout of Outpatient Department in hospital.
6. Design the layout of ICU in hospital.
7. Design the layout of Surgical Operation Theatre Complex in hospital.
8. Design the layout of Radiology Department in hospital.
9. Design the layout of Pathology Laboratory and Blood Bank Department in hospital.
10. Design the layout of Physiotherapy Department in hospital.
11. Design the layout of Central Sterile Supply Department in hospital.

Any other experiment based on syllabus which will help learner to understand topic/concept.

Group Presentation based on the assigned topic by visiting a hospital.

 Assessment:
Term Work:

Term work shall consist of minimum 4 experiments, 4 assignments and presentation.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments): 10 Marks
Laboratory work (Assignments): 05 Marks
Presentations   : 05 Marks
Attendance   : 05 Marks
The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Oral examination will be based on suggested practical list and entire syllabus.

Course Objectives	• To make the learner aware of fundamental concepts of Robotics • To make learner study direct and Inverse Kinematics of Robots • To make learner know the Trajectory and Motion planning. • To make the learner know the Biomedical applications of robotics	
Course Outcomes	• To describe direct and inverse kinematics of robots. • To describe workspace envelop and trajectory planning for robots • To apply various image processing tools for robotic manipulation • To implement motion planning solutions using various algorithms • To illustrate medical applications of robots	

Syllabus: Same as that of BMDO8011 Hospital Management (HM).

List of Experiments: (Any Seven)

Students can perform any other experiment/Mini project/ Seminar/ Scholarly paper review based on the theory syllabus. The coding can be done in MATLAB/SCILAB/Python/C

1. Fundamental and Composite Rotations of Mobile frame with respect to fixed frame
2. Homogeneous Transformations and Screw Transformations
3. Kinematic configurations and Link Coordinate Transformations matrix(Arm Matrix)
4. Direct Kinematics of 2-3 axis Planar Robot and find the location of Tool tip.
5. Direct Kinematic Analysis of 4,5 Axis Robot
6. Inverse Kinematics of robots and prove that there are multiple ways to reach a particular point.
7. Develop Work Envelop for 2,3 axis Robot
8. To study segmentation using edge detection technique
9. Straight line trajectory planning-BDA Algorithm
10. Template Matching
11. Gross motion planning is a part of task planning of robot. Suggest any method of gross motion planning so that the task can be completed without hitting obstacles
12. Presentation/ Seminar/Case study on Biomedical Application of robotics

Assessment:

Term Work:

Term work shall consist of minimum 4 experiments, 4 assignments and presentation.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments): 10 Marks
Laboratory work (Journal / Mini project): 05 Marks
Presentations: 05 Marks
Attendance: 05 Marks
The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Oral examination will be based on suggested practical list and entire syllabus.

Course Objectives	• To understand the healthcare interoperability semantic and syntactic. • To understand the standards of healthcare interoperability standards for Medical Images and Medical Messages.	
Course Outcomes	**Learners will be able to:** • Fabricate HL7 Messages • Edit and Compare DICOM file.	

Syllabus: Same as that of BMDO8012 Healthcare Informatics (HCI).

List of Experiments: (Any Seven)
1. To find term/ Concept and ID or Vocabulary codes.
2. Identifying and Chapters of Health Level 7 for trigger Event and message types and message.
3. Structure should be sent to cover each requirement.
4. Reading and editing segment.
5. Create Health Level 7 Message.
6. Create Patient Information Database from Health Level 7 Messages.
7. To Study DICOM Validation Tool (DVTK).
8. Edit DICOM File using hex-Editor.
9. Creating Database of a patient.
10. Comparing DICOM file.

Any other experiment based on syllabus which will help learner to understand topic/concept.

Assessment:
Term Work:
  Term work shall consist of minimum 7 experiments.
  The distribution of marks for term work shall be as follows:
  Laboratory work (Experiments): 10 Marks
  Laboratory work (Journal)   : 10 Marks

Course Code	Course Name	Credits
BMP801	Major Project-II	06
Course objective	• Implement the concept of Project Stage-I • Use advanced tools for Implementation • Rectify/ Debug the design and Submit project report.	
Course Outcome	**Learner will be able to** • Debug/ Rectify the design incurred during implementation • Write Analysis, Results, Design in prescribed format • Learn the behavioural science by working in a group	

Project Guidelines:

1. The students have already under gone project assignment in their seventh semester and in this semester the students are expected to continue the project work of stage I and should attempt solution to the problem.
2. Learner is allotted 12 hrs per week for the project work
3. Report should be prepared as per the guidelines issued by the University of Mumbai
4. Learners should be motivated to publish a paper based on the work in Conferences/students competitions
5. Project Groups: Learners can form groups not more than 4 (Four)

Faculty Load:

1. In semester VIII - 1 (One) periods of 1 hour each per week per project group
2. Each faculty is permitted to take (guide) maximum 4 (Four) project groups.

Assessment:

Term Work:

The Term Work should be examined by approved internal faculty appointed by the head of the institute based on following:

- Scope and objective of the project work.
- Extensive Literature survey.
- Progress of the work (Continuous assessment)
- Report in prescribed University format.

Guidelines for Assessment of Project Stage- II

1. Project II should be assessed through a presentation jointly by Internal and External Examiners approved by the University of Mumbai
2. Project stage II should be assessed based on following points
   - Quality of problem selected
   - Clarity of Problem definition and Feasibility of problem solution
   - Relevance to the specialization / Industrial trends
   - Clarity of objective and scope
   - Quality of work attempted
   - Validation of results
   - Compilation of Project Report
   - Quality of Written and Oral Presentation

Dr. Suresh K. Ukarande
Associate Dean,
Faculty of Science and Technology
