Q. 1 Following figure shows the pictorial view of an object, draw

1. Sectional front view along section $A-A$
2. Top view.
3. Right Hand Side view
4. Insert at least 10 dimensions

IV
Q. 2 [a] A cylinder of diameter 50 and axis 65 mm long is lying on H.P on its curved surface with axis inclined a 45 degree to V.P and parallel to H.P. Draw the projections of cylinder.

[b] Draw the isometric view of the object whose FV and TV are as given below.

Q. 3 [A] The pictorial view of a machine part is shown in following figure Draw

1. Front view from the direction " $X$ ".
2. Top view
3. Insert at least 6 Dimensions.

Q. 4 A pentagonal pyramid, side of base 35 mm and axis 65 mm long is resting on one of its corners on HP such that one of the triangular surfaces is parallel to HP and perpendicular to VP. Draw the projections of solid when the base edge containing that triangular surface is parallel to both HP and VP. The apex of the pyramid is being nearer to observer.

Sol:
