

# University of Mumbai

## Syllabus for Approval

O: Title of Course	T.Y.B.Sc.
	Applied Component (Heavy & Fine
	Chemicals)
O: Eligibility	As per University Ordinance
R: Passing Marks	40%
No. of years/Semesters:	Three
Level:	UG
Pattern:	Semester
Status:	Revised
To be implemented from Academic Year :	From Academic Year: 2024-25

Sign of the BOS Coordinator Dr. Sunil Patil BOS in Chemistry Sign of the Offg. Associate Dean Dr. Madhav R. Rajwade Faculty of Science & Technology Sign of the Offg. Dean Prof. Shivram S. Garje Faculty of Science & Technology

# Preamble

#### 1) Introduction

The B.Sc (Chemistry) program is meticulously structured to foster a deep understanding of chemical principles and their real-world applications. The curriculum is a blend of theoretical knowledge and hands-on experience, ensuring that students not only grasp the core concepts but also develop a passion for the subject. With a focus on continuous assessment through quizzes, class tests, and assignments, the program emphasizes the importance of a strong conceptual foundation. This approach is complemented by practical experiments, where theoretical knowledge is applied, enhancing the learning experience and preparing students to tackle the multifaceted challenges in the field of chemistry.

#### 2) Aims and Objectives

The B.Sc (Chemistry) program is structured to equip students with a comprehensive understanding of chemical principles and their real-world applications. It aims to foster a deep appreciation for the subject, encouraging students to engage in critical thinking and problem-solving. By integrating theoretical knowledge with practical skills, the course prepares graduates for diverse careers in research, industry, education, and beyond, contributing to their holistic academic and professional growth.

#### 3) Learning Outcomes

Building a robust foundation in Applied Component principles is indeed crucial for anyone aiming to excel in scientific disciplines. This solid grounding not only prepares one for the complexities of the field but also enhances adaptability to the dynamic nature of scientific research. As the field of chemistry continues to expand, professionals who embrace continuous learning and exhibit a strong sense of curiosity will likely be at the forefront of pioneering discoveries. Moreover, the versatility of chemistry as a discipline offers a plethora of career opportunities across various industries, ensuring that those with a passion for the subject can find their niche and contribute meaningfully to society.

#### 4) Any other point (if any)

The program is meticulously designed to lay a solid foundation in the subject, equipping students with essential skills and knowledge. Through a blend of theoretical understanding and practical application, the curriculum aims to fortify the students' grasp of the basics, ensuring they are well-prepared for advanced study or professional application in the field. This foundational strength is crucial for their academic and career progression, providing a robust platform from which they can build expertise and specialization.

# T.Y. B. Sc. CHEMISTRY (6 UNITS)

Choice Based Semester and Grading System

To be implemented from the Academic year 2024-25

## **Applied Component:** Heavy & Fine Chemicals

### SEMESTER V

Course Code: USACHFC501	Credits: 02	Lectures: 60

Unit		Торіс	No. of	Total No.
			Lectures	of Lectures
Ι	1.1	Introduction to Heavy and Fine Chemicals	3	
		1.1.1 Introduction, commercial classification of		
		chemicals, Classification of heavy and fine chemicals		
		1.1.2 The Fine Chemical Industry		
		Fine Chemical/Custom Manufacturing Companies,		
		Contract Research Organizations and Laboratory		
		Chemical Suppliers.		
		1.1.3 The Heavy Chemical Industry-		
		Organic and Inorganic chemicals		
	1.2	1.2 Silicates:	4	
		1.2.1 Introduction to silicates		1 -
		1.2.2 Properties, structure and types of silicates.		15
		Preparation of sodium silicate.		
	1.3	Manufacture and applications of the following:	8	
		1.3.1 Talcum powder		
		1.3.2 Nitric acid		
		1.3.3 Sodium dichromate		
		1.3.4 Chromium trioxide		
II	2.1	Pumps for chemical work: Introduction of pumps	8	15
		2.1.1 Pumping equipment's for liquids: piston pump		
		2.1.2 Diaphragm pump		
		2.1.3 Gear pump		
		2.1.4. Screw pump		
		2.1.4 Rotary Vane pumps		
		2.1.5 Centrifugal pumps.		
	2.2	Vacuum systems oil sealed pumps, ejectors.	3	
	2.3	Fertilizers: Preparation, properties and uses of-	4	
		2.3.1 Normal superphosphate		
		2.3.2 Triple Superphosphate		
		2.3.3 Ammonium nitrate		

		2.3.4 Ammonium Sulphate		
III	3.1	3.1 Brief idea about the economic aspects of	7	15
		chemical manufacturing processes with respect to -		
		3.1.1 Location		
		3.1.2 Raw materials		
		3.1.3 Energy		
		3.1.4 Capital		
		3.1.5 Manpower		
		3.1.6 Ecological aspects		
		3.1.7 Tax benefits.		
		3.1.8 Writing a Project Report for setting up MSME		
	3.2	Brief account of perfumes, flavours and sweeteners:	8	
		3.2.1 Perfumes: Introduction, classification (ethers,		
		esters and essential oils) Composition, formation,		
		blending and applications. Synthesis of $\alpha$ and $\beta$ -		
		ionone's from citral		
		3.2.2. Elayours: Introduction Classification (natural		
		and synthetic) applications of Vanillin		
		Coumarin (structures). Synthesis of Vanillin		
		3.2.3 Sweeteners: Introduction classification with		
		examples and structures of '-		
		Natural Sweeteners: Carbohydrates (Glucose		
		Fructose) Synthetic sweeteners: i) Sucralose		
		i) Sulphonamide: Saccharin jij) Pentides: Aspartame		
		Suphonia of Social and Suphonia (1997)		
<b>TT</b> 7		Synthesis of Saccharm.		1.2
IV	4.1	Industrial solvents:	6	15
		4.1.1 Manufacture and uses of ethyl acetate ,1sopropyl		
		alcohol, Acetone, Acetic acid, Dimethyl formamide,		
		4.1.2 Brief idea of green solvents.		
	4.2	Introduction to drugs and drug intermediates :	6	
		4.2.1 Terminology, Classification with one example		
		each.		
		4.2.2 Synthesis and uses of the following i) p-Acetyl		
		amino benzenesulphonyl chloride from Aniline		
		ii) Epichlorohydrine from propene iii) Ethambutol		
		iv) Mebendazole v) Miconazole vi) Diazepam.		
	4.3	Fluoroaromatics:	3	
		Introduction, important reagents used for fluorination.		
		Halex reaction. Super Halex reaction. Preparation of		
		ortho-fluorotoluene and 3-chloro-4-fluoro aniline.		
			1	<u> </u>

## PRACTICALS

## **SEMESTER V**

## Course Code: USACHFC5P1

Credits: 02

#### **Preparation:** (Micro scale)

- 1. Nerolin
- **2.** Copper sulphate pentahydrate.
- **3.** Green synthesis of benzillic acid from benzil

### **Estimations:**

**4.** Determination of the amount of phosphoric acid from a given sample using 1-naphtholphthalein and phenolphthalein indicator. (Students to prepare succinic acid solution for standardization of NaOH).

**5.** Determination of the amount of magnesium hydroxide in a commercial sample of milk of magnesia.

**6.** Estimation of tincture iodine from commercial sample.

7. Estimation of methyl salicylate. (Back titration method).

## SEMESTER VI

Course Code: USACHFC506	Credits: 02	Lectures: 60

Unit		Торіс	No. of	Total No.
			Lectures	of Lectures
Ι	1.1	<b>Refrigeration:</b> System, media used for cold transfer (i.e.	3	
		brine and other)		15
	1.2	Different Sources of Energy:	3	
		Generation, Treatment of boiler feed water, Properties of		
		steam, steam table		
	1.3	Glass: Composition, types and applications.	3	
	1.4	Manufacturing process properties and applications of :	6	
	-	1.4.1 Sulphuric acid (Contact Process)		
		1.4.2 Ammonia (Haber's process)		
		1.4.3 Sodium hydroxide		
II	2.1	Zeolites, Clays and Ion-exchange resins	3	15
	2.2	Design of vessel:	4	
		Classification of chemical reactors, pressure vessels for		
		internal or external pressure, Maintenance, storage vessels		
		for liquids and gases.		
	2.3	Manufacture and uses of Industrial gases :	2	
		Hydrogen and Acetylene		
	2.4	Industrial preparation of Inorganic Fine chemicals:	2	
		KMnO4, FeSO4.7H2O		

	2.5	Composite materials:	4	
		Introduction, Constitution of composites, Classification of		
		composites, Particle Reinforced composites, Fiber		
		reinforced composites, Structural		
		Composites or Layered composites, Applications of		
		composite materials.		
III	3.1	Small Scale Industries, R & D and Technology transfer	5	15
		:		
		Introduction- Industry Structure, Need and scope of small		
		scale industry, SSI rules and regulations, R and D,		
		technology transfer, Role of R and D, Functional structure		
		of R and D unit, Research strategies and manufacturing		
		interface, University-Industry interface, IPR- Patents,		
		Trade Mark.		
	3.2	Manufacture of soaps: Raw materials, Preparation,	3	
		properties and types of soaps, Continuous process for the		
		manufacture of soap.		
	33	Oils and Fats:	4	
	0.0	Introduction, Classification, Properties of oils and fats	•	
		extraction of oils from oil seeds, hydraulic pressing and		
		solvent extraction, extraction of animal fats, hardening		
		of oils.		
	3.4	Detergents: Introduction,	3	
	3.4	<b>Detergents:</b> Introduction, Classification, manufacture of DDBS, Industrial	3	
	3.4	<b>Detergents:</b> Introduction, Classification, manufacture of DDBS, Industrial applications	3	
IV	3.4 4.1	Detergents: Introduction, Classification, manufacture of DDBS, Industrial applicationsUnit Operations: General idea of the following	3	15
IV	3.4 4.1	Detergents: Introduction, Classification, manufacture of DDBS, Industrial applications Unit Operations: General idea of the following operations used in Industries:	3	15
IV	3.4 4.1	<ul> <li>Detergents: Introduction, Classification, manufacture of DDBS, Industrial applications</li> <li>Unit Operations: General idea of the following operations used in Industries:</li> <li>4.1.1 Filtration: Introduction, factors affecting the rate of</li> </ul>	3	15

## PRACTICALS

## **SEMESTER VI**

#### **Course Code: USACHFC6P2**

Credits: 02

#### The Regional Case-Study Project (30 Hrs.)

#### Introduction:

As per the guidelines from UGC, HEIs are expected to introduce a compulsory course to provide community engagement to all undergraduate students so that their appreciation of Social realities is holistic, respectful and inspiring. Such course will enable students to learn about rural/urban challenges and develop understanding of social wisdom and life-style in a respectful manner.

#### **Objectives:**

- To develop an appreciation of rural/urban culture, life style and wisdom amongst students.
- To understand a real life situation about a problem.

• To apply classroom knowledge of Chemistry courses to field realities and thereby improve quality of learning.

• To interact with key stakeholders such as government officials, people Representatives, common people etc.

• To communicate key findings of the study to stakeholders.

### **Learning Outcomes:**

After completing course, students will be able to

- Gain an understanding of rural/urban life, culture and social realities
- Gain an understanding real-life problems
- Develop a sense of empathy and bonds of mutuality with local community
- Learn to value the local knowledge and wisdom of the community
- Identify opportunities for contributing to community's socio-economic improvement

## **Course Contents:**

#### Part-I Theory of case study:

- Introduction to case study
- What is a case study?
- Types of case studies
- Planning a Case Study
- Researching a Case Study
- Strengths and Weaknesses of Case Studies
- Writing a Case Study
- References

## Part II Case study Project (Field work)

## Typical Key Areas for field-based project activities:

• Environmental Problems: For example estimation of PAH from soil/sewage

samples, estimation of water pollution in nearby locality, estimation of the micro-plastics in Soil in the nearby locality, study of solid and liquid waste generation in a ward/city/village etc.

• Analysis of food Material: For example, identification and estimation of food adulterants, estimation of selenium content in bread available in the local market etc.

• Soil, Water, material analysis: For example, examination and analysis water quality in nearby locality, study of materials and dyes used in a local industry, conduct soil health test (for analysis of Pb, N, P, K, S, C, moisture content, pH and micronutrient contents such as Cu, Zn, Mn, Fe) etc.

• **Study of government development programs**: For example effects of Swachh Bharat Abhiyan on the quality of soil and water, to prepare a village sanitation plan, Energy use and fuel efficiency surveys etc.

• Agriculture: For example,Organise orientation programmes for farmers regarding Organic cultivation, rational use of irrigation and fertilizers and promotion of traditional species of crops and plants etc.

(Above activities represent some of the possible activities that can be undertaken by Students. However, depending upon local needs students can select and undertake relevant Case-study projects. It is recommended that a practical batch of 20 students can undertake minimum 5-6 case-study projects i.e. one case-study project can be undertaken by group of maximum four students)

### **Case-Study Project Evaluation:**

#### **Project Report:**

After successful completion of a case-study project, the student group will prepare a consolidated report covering title, Rational and gap analysis, objectives, hypothesis, project design and methodology, preliminary work/survey, expected out-come, benefits to society (Project outcome), SWOC analysis and important references etc.

#### **Project presentation (by students Group):**

The students group will present the case study project at the time of practical examination.

#### **Evaluation scheme:**

Evaluation of student based on Part -I	10 Marks
Identification of problem, Rational, Problem statement and expected benefits-	10Marks
Case-study design and methodology, Data management and interpretation, , clarity, coherence and appropriateness of case study design, Organisation and logical flow of ideas and materials	30 Marks
Presentation skills, role, responsibilities involvement of group members, learning mechanism in group, clear, concise and thoughtful responses to questions, team work	20 Marks

#### **Evaluation Pattern for Semesters V and VI**

#### **Semester End Theory Examination**

Internal Continuous Assessment:	Semester End	Duration for End
25% (25 Marks)	Examination:	Semester
	75% (75 Marks)	Examination
<b>Continuous Evaluation through:</b>	As per following pattern	2 hrs 30 minutes
Quizzes, Class Tests, Presentations,		
Projects, Role Plays, Creative		
Writings, Assignments, etc.		

#### Pattern for Semester End Examination (75 Marks):

- 1. Duration This examination shall be of **Two hours and 30 minutes** duration.
- 2. Theory question paper pattern:
  - a. There shall be **05** questions each of **15 marks**.
  - b. All questions shall be compulsory with internal choice within the questions.

Question	Option	Marks	Based on Units
Q.1	Subjective questions 3 out of 5	15	Unit I
